went into creating cartographic knowledge in and about the Americas In the introduction editor Martin Bruckner provides a critical assessment of the concept of cartography and of the historiography of maps The individual essays then range widely over space and place from the imperial reach of Iberian and British cartography to indigenous conceptualizations including dirty ephemeral maps and star charts to demonstrate that pre nineteenth century American cartography was at once a multiform and multicultural affair This volume not only highlights the collaborative genesis of cartographic knowledge about the early Americas the essays also bring to light original archives and innovative methodologies for investigating spatial relations among peoples in the western hemisphere Taken together the authors reveal the roles of early American cartographies in shaping popular notions of national space informing visual perception animating literary imagination and structuring the political history of Anglo and Ibero America The contributors are Martin Bruckner University of Delaware Michael J Drexler Bucknell University Matthew H Edney University of Southern Maine Jess Edwards Manchester Metropolitan University Junia Ferreira Furtado Universidade Federal de Minas Gerais Brazil William Gustav Gartner University of Wisconsin Madison Gavin Hollis Hunter College of the City University of New York Scott Lehman independent scholar Ken MacMillan University of Calgary Barbara E Mundy Fordham University Andrew Newman Stony Brook University Ricardo Padron University of Virginia Judith Ridner Mississippi State University
