More than a gripping detective story *Lion Hearted* is an exploration of humanity's relationship with the natural world and an attempt to keep this majestic species from disappearing. Lions are one of the most beloved animals on the planet. Loveridge observes, "They are the national symbol of no fewer than fifteen countries. Surely we can think of a better way to save the wild animals we love besides killing them."

Mistaking Africa Curtis Keim, Carolyn Somerville, 2018-04-17 For many Americans the mention of Africa immediately conjures up images of safaris, ferocious animals, strangely dressed tribesmen and impenetrable jungles. Although the occasional newspaper headline mentions authoritarian rule, corruption, genocide, devastating illnesses or civil war in Africa, the collective American consciousness still carries strong mental images of Africa that are reflected in advertising, movies, amusement parks, cartoons and many other corners of society. Few think to question these perceptions or how they came to be so deeply lodged in American minds. *Mistaking Africa* looks at the historical evolution of this mind set and examines the role that popular media plays in its creation. The authors address the most prevalent myths and preconceptions and demonstrate how these prevent a true understanding of the enormously diverse peoples and cultures of Africa. Updated throughout, the fourth edition covers the entire continent, North and sub-Saharan Africa, and provides new analysis of topics such as social media and the Internet, the Ebola crisis, celebrity aid and the Arab Spring. *Mistaking Africa* is an important book for African studies courses and for anyone interested in unravelling American misperceptions about the continent.

Criticizing Ben Undeleted 0.1 , **Footprints in Obscurity** Pramudith D. Rupasinghe, 2016-03-01 Pramudith D. Rupasinghe was born in Gampaha, Sri Lanka. His multi-disciplinary academic excellence in clinical psychology, political science, development studies and humanitarian diplomacy, along with linguistic competency in English, French and Russian, paved his path to enter the humanitarian arena. His humanitarian service has been extended to many parts of the world, working with various organizations including the Red Cross and Red Crescent Movement and the United Nations. *Footprints in Obscurity* is the refreshing experience of a brave young man who stepped in to the unknown a decade and a half ago. The author takes a walk down memory lane as he vividly narrates a series of real stories that are interconnected and built around the lives of men and women whom he had the rare opportunity to witness first-hand. A boy who was dreaming to discover the imaginary world that conquered his mind when his father was relating free-time stories realizes his dream after three decades, breaking frontiers and overcoming diverse hurdles on the way. He brings out the voices that were destined to be silent for ever to the attention of the world audience in a forceful manner. *Footprints in Obscurity* can be introduced as an impressive effort by the author not only to narrate a true story about Africa but also to bring to light how childhood dreams shape one's adult life.

Surein Peiris, Senior Officer, Humanitarian Diplomacy, IFRC Geneva. **Protecting Animals Within and Across Borders** Charlotte E. Blattner, 2019 How can we protect animals more effectively both at home and abroad given the ongoing globalization of animal production? This book provides a catalogue of options for extraterritorial jurisdiction which states can employ to strengthen their animal laws. It offers top-down perspectives drawn from general

international law and trade law and complements them by a bottom up view from the perspective of animal law

Extending ecocriticism Peter Barry, William Welstead, 2017-10-30 This volume of essays explores the scope for a further extension of ecocriticism across the environmental humanities Contributors who include both established academics and early career researchers in the humanities were given free rein to interpret the brief The collection is unusual in that it considers collaboration between individuals both in the same discipline and across creative disciplines Subjects include familiar environments close to home and those such as Iceland and Antarctica where narratives of climate geology and ecology provide a stark backdrop to creative output A further innovation is the inclusion of essays on public art natural heritage interpretation and the visualisation and aesthetic impact of wind farms The book will be of interest to writers artists students and researchers in the environmental humanities and those with a general interest in the cultural response to the environment
