

Celestron NexStar+ Hand Control

TROUBLESHOOTING GUIDE

This troubleshooting guide can help you resolve problems related to the Celestron NexStar+ Hand Control. Specifically, if you have a “No Response” error, “BOOT LOADER” error, or the hand control reports the improper telescope model, follow the instructions below to see if you can fix the problem on your own.

POSSIBLE PROBLEMS

PROBLEM #1

“No Response” Errors

The hand control displays No Response errors when plugged into the mount, and the mount is powered on.

- If the hand control displays **No Response 16** **OR** **No Response 17** (only one of these errors and not both), the problem is with the mount, not the hand control. Contact Celestron Technical Support at celestron.com/pages/technical-support for assistance.
- If the hand control displays **BOTH** No Response 16 and No Response 17, the problem could be with either the mount or the hand control.
 - If your mount has an AUX port(s), try plugging the hand control into the AUX port instead of the HC (hand control) port. If the No Response error goes away, there is a problem with your mount's HC port. You can still use the mount by plugging the hand control into one of the AUX ports.
 - There could be a problem with your power source providing too low voltage or current. Try using a different power source to see if the problem goes away.
 - Updating the hand control firmware with Celestron Firmware Manager may resolve the problem. We'll explain how in the next section.
- If using the Celestron Focus Motor, and the hand control displays **No Response 18**, then there is an issue with the focus motor not responding or not being detected by the hand control. If this occurs, try using CFM to update the hand control firmware to see if this resolves the issue. We'll explain how to do this in the next section.
 - If updating the hand control firmware does not resolve the No Response 18 error, then there may be a problem with the focus motor's cable or the focus motor itself. In this case, please contact [Celestron Technical Support](http://Celestron.Technical.Support) for further assistance.
