Mims,2000-06-19 Infectious diseases are the leading cause of death worldwide In The War Within Us well known author and infectious disease specialist Cedric Mims makes the intricacies of the immune system and infectious diseases less baffling for the general reader and answers the questions of how things work and why The story is told in terms of the ancient conflict between the invader the infectious disease and the defender the body s immune system and the strategies and counter strategies used by both sides making it a book that is both informative and interesting to read The War Within Us is an ideal introduction to the basics of immunity and infection for general readers and students It also serves as a quick reference book for physicians researchers and other health workers Parasite versus host The conflict how we defend ourselves The microbe s response to our defence How microbes cause diseases Thumbnail sketches of seven selected diseases The threat of new diseases **The Complete Home Learning Sourcebook** Rebecca Rupp,1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level *The Republican War on Science* Chris Mooney,2007-03-16 Science has never been more crucial to deciding the political issues facing the country Yet science and scientists have less influence with the federal government than at any time since the Eisenhower administration In the White House and Congress today findings are reported in a politicized manner spun or distorted to fit the speaker s agenda or when they re too inconvenient ignored entirely On a broad array of issues stem cell research climate change missile defense abstinence education product safety environmental regulation and many others the Bush administration s positions fly in the face of overwhelming scientific consensus Federal science agencies once fiercely independent under both Republican and Democratic presidents are increasingly staffed by political appointees and fringe theorists who know industry lobbyists and evangelical activists far better than they know the science This is not unique to the Bush administration but it is largely a Republican phenomenon born of a conservative dislike of environmental health and safety regulation and at the extremes of evolution and legalized abortion In The Republican War on Science Chris Mooney ties together the disparate strands of the attack on science into a compelling and frightening account of our government s increasing unwillingness to distinguish between legitimate research and ideologically driven pseudoscience **Synaptic Self** Joseph LeDoux,2003-01-28 In 1996

Joseph LeDoux's *The Emotional Brain* presented a revelatory examination of the biological bases of our emotions and memories. Now the world renowned expert on the brain has produced with a groundbreaking work that tells a more profound story how the little spaces between the neurons the brain's synapses are the channels through which we think act imagine feel and remember. Synapses encode the essence of personality enabling each of us to function as a distinctive integrated individual from moment to moment. Exploring the functioning of memory the synaptic basis of mental illness and drug addiction and the mechanism of self awareness *Synaptic Self* is a provocative and mind expanding work that is destined to become a classic.

The Voices of War Michael Caulfield, 2010-11-01 Drawn from engagements ranging from World War I through to operations in East Timor and Iraq these stories are taken from the Australians at War Film Archive a collection of the memories of more than 2000 Australians who have served both on the front line and at home. Some are unbelievably unbearably tragic even after sixty or seventy years others are the golden memories of happy albeit unusual times. And more often than not they are stories that have never been shared with others even family members. There are stories from winners of the Victoria Cross from the POW camps of Asia and Europe from the patrols of Vietnam through to those who served as peacekeepers in Rwanda and Somalia. There are stories from nurses from those who have volunteered to serve with aid agencies and stories of ordinary Australians caught up by circumstances and by duty in wartime. These are their words.

Quantitative History of China Zhiwu Chen, Cameron Campbell, Debin Ma, 2025-09-25 This Open Access book marks the beginning of a new era in the study of Chinese history. Since the beginning of the computer age quantitative techniques have been increasingly used to study specific topics like family population and living standards in China's past. However sample sizes have usually been small due to either historical archives availability constraints or limited human processing capacity. With much increased computing power and machine assisted reading processing capacity many big historical databases have become available offering quantitative historians and social scientists great opportunities to study China's past development experience. This volume showcases a collection of new findings concerning China's political social and economic history and typically based on newly constructed large historical datasets. Most of the work has involved an interdisciplinary team of economists sociologists political scientists historians and econometricians demonstrating how new big data and quantitative methods may be brought to bear on some of the biggest questions related to China's development over the past three millennia and on the implications of distant past events on contemporary China. Topics covered range from the roles of war state formation religion culture finance and institutions in long run development and technological innovations to regicide history to the organization and capacity of the bureaucracy. Contributors include leading figures in the quantitative study of China's long run socioeconomic and political history. This volume will be of value to anyone with an interest in Chinese economic political social and or institutional history as well as anyone interested in quantitative history more generally.
