Circles Of Compassion Essays Connecting Issues Of Justice:

Circles of Compassion Will Tuttle, 2014-10-28 What is the link between compassion for animals social justice and harmony in our human world This book consists of a series of essays by internationally recognized authors and activists These insightful and inspiring essays focus on how the seemingly disparate issues of human animal and environmental rights are indeed connected Illuminating the connections between injustice to animals and the various forms of social and ecological injustice these thirty authors provide essential keys to effectively addressing the hidden roots of our dilemmas The essays also provide practical guidance about how to make the individual systemic and social changes necessary to effectively create a peaceful and just world for all This landmark book provides a crucial impetus for us to break through our confining delusions build bridges of understanding and awaken from the cultural trance of indifference and inequity *The Human Animal Earthling Identity* Carrie P. Freeman, 2020-12-01 With *The Human Animal Earthling Identity* Carrie P. Freeman asks us to reconsider the devastating division we have created between the human and animal conditions leading to mass exploitation injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values and goals on issues such as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman s analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share **The Oxford Handbook of Food Ethics** Anne Barnhill, Tyler Doggett, Mark Budolfson, 2018-01-08 Academic food ethics incorporates work from philosophy but also anthropology economics the environmental sciences and other natural sciences geography law and sociology Scholars from these fields have been producing work for decades on the food system and on ethical social and policy issues connected to the food system Yet in
