Creative Politics Taxes And Public Goods In A Federal System:

Creative Politics Glenn Douglas Beamer, 2010-06-02 State legislators are constantly making tradeoffs between changing taxes and providing public services Not only must they reconcile their own policy preferences with the preferences of their constituents but they must consider the impact of actions taken by both the federal government and competing states Glenn Beamer uses a series of in depth case studies in eleven states to show how legislators made decisions dealing with taxation economic development education financing and Medicaid Beamer identifies six factors that influence legislators decisions accountability dependability equity obscurability and horizontal and vertical transferability Within the context created by citizen demands intergovernmental politics policy histories court interventions and state constitutions this study analyzes how legislators employ these principles to develop and enact policies In addition to modeling state politics within the context of federalism *Creative Politics* reflecting the author s extensive interviews with legislators is novel in its focus on politicians views about public services the strategies to finance them and efforts to develop and maintain political support for them This book will be of interest to students and scholars of political science economics and public administration and more specifically of federalism state politics and policy and legislative decision making Glenn Beamer is Robert Wood Johnson Scholar in Health Policy Research University of California Berkeley and Assistant Professor of Government University of Virginia

School's In Paul Manna,2006-06-01 For most of the history of the United States citizens and elected officials alike considered elementary and secondary education to be the quintessential state and local function Only in the past four decades from Lyndon B Johnson s signing of the landmark Elementary and Secondary Education Act of 1965 to George W Bush s ambitious but controversial No Child Left Behind initiative has Washington s influence over America s schools increased significantly Today many Americans have become more convinced that the U S government and the states should play an increasingly important role in the nation s schools In *School s In* Paul Manna looks over forty years of national education policymaking and asserts that although Washington s influence over American schools has indeed increased we should neither overestimate the expansion of federal power nor underestimate the resiliency and continuing influence of the states States are developing comprehensive often innovative education policies and a wide array of educational issues have appeared on the political agenda at the state and national levels Manna believes that this overlap is no accident At the core of his argument is the idea of borrowing strength a process by which policy entrepreneurs at one level of government attempt to push their agendas by leveraging the capabilities possessed by other governments in the federal system Our nation s education agenda he says has taken shape through the interaction of policy makers at national and state levels who borrow strength from each other to develop and enact educational reforms Based on analyses of public laws presidential speeches congressional testimony public opinion political advertising and personal interviews *School s In* draws on concepts of federalism and agenda setting to offer an original view of the growing federal role in education policy It provides insights not only about how education agendas have changed and will likely unfold in the future but also about the very nature of federalism in the United States

The Supreme Court's Federalism Frank Goodman, 2001-03 In the last decade the Supreme Court has handed down a remarkable series of decisions invalidating congressional legislation in the name of federalism or states rights Most of these were decided by a razor thin majority of five justices The cases fall into four categories First in two cases the Court reaffirmed and expanded the principle of state sovereign immunity In a second pair of cases the Court held that state governments other than their courts cannot be commandeered by Congress to assist in the enforcement of federal law Third for the first time since the early New Deal the Court but the familiar 5 4 margin invalidated a federal statute enacted pursuant to the interstate commerce clause Finally the Court adopted a new and extremely demanding standard of review for congressional action under Section 5 of the Fourteenth Amendment which empowers Congress to enforce the amendment by appropriate legislation The 13 articles in this volume of *The Annals* deal with the various aspects of the Supreme Court's federalist revival and the principles underlying it The first three articles discuss these principles in comprehensive terms Each of the next three articles focuses on a particular aspect of the federalism principle or its judicial enforcement These articles are followed by a contribution with regard to Congress ability to escape the constitutional limitations of federalism by means of conditional grants under the spending clause The next three articles point up alternative themes purposes or agendas in the Court's federalism decisions Another two contributions focus on the anti commandeering issue but place that issue in a broader context The final article illuminates from several perspectives the four year old federal habeas corpus statute the Anti Terrorism and Effective Death Penalty Act The Supreme Court's recent decision in *Bush v Gore* issued shortly before this volume went to press dramatically reverses the case and principles that are the subject of the articles in this volume Perhaps the best justification for the Court's action is not legal but political The majority justices or some of them may have looked down the road and seen a constitutional catastrophe in the making Unfortunately there is also a less benign explanation one or more of the justices may have reached the conclusion that if the presidential outcome were going to be determined by an act of judicial will it would be their will and not that of the Florida Supreme Court
