Los orígenes Martín Arancibia, 2023-09-01 Con tesn prolijidad y respeto este libro bucea en las profundidades de los textos científicos recopilando organizando y analizando una gran variedad de aquellos que se refieren a los temas que son de interés existencial y que aparecen en el relato cristiano del Génesis el origen del universo y de la vida las leyes de la naturaleza el gran Diluvio los mecanismos instalados para la subsistencia de la vida los interrogantes acerca del misterio de los dinosaurios y muchos otros más Exitosamente se proporcionan los argumentos y las evidencias que confirman las ideas creacionistas intervencionistas y de diseño teleológico en el cosmos Esto representa una valiosa contribución para el teólogo y el agnóstico pero más especialmente para el creyente comprometido e investigador que no se aferra a una doctrina incomprensible sino que permite que su creencia se apoye en una seria y escrutadora reflexión En la inevitable confrontación que surge al tratar las visiones del evolucionismo naturalista y del creacionismo intervencionismo evolucionismo teólogo se instala una fértil interacción entre el texto y el lector atento La comparación entre las evidencias aportadas por la ciencia conduce a la reflexión y al asombro Sin embargo la impresión más frecuente que surge de esta lectura es lo bien fundamentada que está la esperanza bíblica ya que esta depende de nuestros verdaderos orígenes Por eso podemos afirmar que el tiempo utilizado en leer esta obra es una excelente inversión ya que además de estar escrita en un lenguaje sencillo conmueve su corazón y genera sentimientos de admiración ante los maravillosos hechos de la creación de Dios *Historia*
