Criminal Belief Systems Criminal Belief Systems:

Criminal Belief Systems Glenn D. Walters, 2002-09-30 Walters integrates information from traditional criminological models and findings from developmental psychology to form a system of five belief systems self view world view past view present view and future view designed to explain crime initiation and maintenance While reviewing belief systems that support crime Walters also offers a model of change through which belief systems incongruent with crime can be constructed He begins with a review of six traditional criminological models each of which is considered to possess sufficient breadth and substance to advance our understanding of crime Information gathered from these major theoretical systems is integrated with research from developmental psychology to create a system of crime congruent belief systems The belief systems along with recent research on attributions outcome expectancies efficacy expectancies values goals and thinking styles are then used to construct a general theory of crime and explain four specific categories of crime violent crime sexual assault white collar crime and drug trafficking Walters concludes with a model of assisted change whereby belief systems incongruent with crime are initiated and maintained with the intent of helping people abandon crime congruent lifestyles This change model revolves around four core elements responsibility confidence meaning community each of which is emphasized in a clinician's interactions with clients seeking to abandon crime congruent lifestyles As Walters maintains belief systems are instrumental in both the development and cessation of crime congruent lifestyles Of particular interest to scholars students researchers and practitioners involved with criminology criminal justice and clinical and correctional psychology The Neural Basis of Human Belief Systems Frank Krueger, Jordan Grafman, 2012-08-21 Is the everyday understanding of belief susceptible to scientific investigation Belief is one of the most commonly used yet unexplained terms in neuroscience Beliefs can be seen as forms of mental representations and one of the building blocks of our conscious thoughts This book provides an interdisciplinary overview of what we currently know about the neural basis of human belief systems and how different belief systems are implemented in the human brain The chapters in this volume explain how the neural correlates of beliefs mediate a range of explicit and implicit behaviours ranging from moral decision making to the practice of religion Drawing inferences from philosophy psychology psychiatry religion and cognitive neuroscience the book has important implications for understanding how different belief systems are implemented in the human brain and outlines the directions which research on the cognitive neuroscience of beliefs should take in the future The Neural Basis of Human Belief Systems will be of great interest to researchers in the fields of psychology philosophy psychiatry and cognitive neuroscience

Encyclopedia of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Tocock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if

assuming their student audience possesses the necessary background to appreciate and integrate the reference. However, university reference librarians can tell you this is often far from the case. Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics: the who, what, where, how, and why. If you will, and reference librarians often find it difficult to guide these students to a quick one-stop source. In response, SAGE Reference is publishing the two-volume *Encyclopedia of Criminological Theory*, available in both print and electronic formats. This serves as a reference source for anyone interested in the roots of contemporary criminological theory. Drawing together a team of international scholars, it examines the global landscape of all the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And like an unabridged dictionary, it provides concise-to-the-point definitions of key concepts, ideas, schools, and figures. Coverage will include contexts and concepts in criminological theory, the social construction of crime, policy implications of theory, diversity, and intercultural contexts, conflict theory, rational choice theories, conservative criminology, feminist theory.

Personality, Personality Disorder and Violence Mary McMurran, Richard Howard, 2009-03-12. Presents the evidence base for links between personality traits, psychological functioning, personality disorder, and violence, with a focus on assessment and treatment approaches that will help clinicians to assess risk in this client group. An evidence-based examination of those personality traits and types of psychological functioning that may contribute to personality disorder and violence, and the links that can be made between the two. Each chapter tackles an area of personality or psychological functioning and includes a developmental perspective, discussion of how to gauge risk, and an outline of effective treatments. Traits covered include impulsivity, aggressiveness, narcissism, and the Big Five: neuroticism, extraversion, openness, agreeableness, and conscientiousness. New for the prestigious Wiley Series in Forensic Clinical Psychology, a market leader with more than 20,000 books in print.

Handbook on Risk and Need Assessment Faye Taxman, 2016-11-10. The *Handbook on Risk and Need Assessment: Theory and Practice* covers risk assessments for individuals being considered for parole or probation. Evidence-based approaches to such decisions help take the emotion and politics out of community corrections. As the United States begins to back away from ineffective, expensive policies of mass incarceration, this handbook will provide the resources needed to help ensure both public safety and the effective rehabilitation of offenders. The ASC Division on Corrections Sentencing Handbook Series will publish volumes on topics ranging from violence risk assessment to specialty courts for drug users, veterans, or the mentally ill. Each thematic volume focuses on a single topical issue that intersects with corrections and sentencing research.
