Classics of International Relations
 Henrik Bliddal, Casper Sylvest, Peter Wilson, 2013-07-24 Classics of International Relations introduces, contextualises and assesses 24 of the most important works on international relations of the last 100 years. Providing an indispensable guide for all students of IR theory from advanced undergraduates to academic specialists, it asks why are these works considered classics? Is their status deserved? Will it endure? It takes as its starting point Norman Angell's best-selling *The Great Illusion* 1909 and concludes with Daniel Deudney's award-winning *Bounding Power* 2006. The volume does not ignore established classics such as Morgenthau's *Politics Among Nations* and Waltz's *Theory of International Politics* but seeks to expand the IR canon beyond its core realist and liberal texts. It thus considers emerging classics such as Linklater's critical sociology of moral boundaries *Men and Citizens in the Theory of International Relations* and Enloe's pioneering gender analysis *Bananas, Beaches and Bases*. It also innovatively considers certain alternative format classics such as Kubrick's satire on the nuclear arms race *Dr Strangelove* and Errol Morris's powerful documentary on war and US foreign policy *The Fog of War*. With an international cast of contributors, many of them leading authorities on their subject, *Classics of International Relations* will become a standard reference for all those wishing to make sense of a rapidly developing and diversifying field. *Classics of International Relations* is designed to become a standard reference text for advanced undergraduates, postgraduates and lecturers in the field of IR.

Analyzing Foreign Policy Crises in Turkey Fuat Aksu, Helin Sari Ertem, 2017-05-11 This collection explores foreign policy crises and the way the states' leaders deal with them. Being at the juncture of a highly sensitive political zone consisting of the Middle East, Europe and Central Asia, the Republic of Turkey has been the subject of various foreign policy crises since its foundation. These political

military economic or humanitarian crises were triggered either by the states themselves or by the NGOs and armed non state actors By examining literature in the field of foreign policy crises literature this volume scrutinizes some of the most prominent Turkish foreign policy crises Among these there are protracted crises such as that of Cyprus and the Aegean Sea a humanitarian one such as the 1989 migration of the Bulgarian Turks an NGO triggered crisis such as the Mavi Marmara Confrontation and an ongoing case such as the Syrian civil war Looking at these crises from various aspects the text sheds light on whether or how the reactions of the Turkish ruling elite change while trying to manage these crises The book is a timely contribution to literature in the field of Politics and International Relations and will be useful to academics diplomats and historians interested in foreign policy crises in general and Turkish foreign policy crises in particular *An Elusive Hope* Amer Nizar Ghrawi,2020-08-10 No detailed description available for *An Elusive Hope* **Hegemony** Richard Howson,Kylie Smith,2008-05 The originality and depth of Gramsci s theory of hegemony is now evidenced in the wide ranging intellectual applications within a growing corpus of research and writings that include social political and cultural theory historical interpretation gender and globalization The reason that hegemony has been so widely and diversely adopted lies in the unique way that Gramsci formulated the problematics of structure superstructure coercion consensus materialism idealism and regression progression within the concept hegemony However in much of the contemporary literature the full complexity of hegemony is either obfuscated or ignored Hegemony through comprehensive and systematic analyses of Gramsci s formulation a picture of hegemony as a complex syncretism of these dichotomies In other words hegemony is presented as a concept that is as much about aspiration and progressive politico social relations as it is about regressive and dominative processes Thus the volume recognises and presents this complexity through a selection of contemporary theoretical as well as historico social investigations that mark a significantly innovative moment in the work on hegemony

Cornelius van Bynkershoek: His Role in the History of International Law Kinji Akashi,2024-01-15 In offering a critical analysis of the writings of Cornelius van Bynkershoek 1673 1743 the eminent Dutch jurist known traditionally as a positivist in the history of international law this work goes beyond an analysis of the classics per se to clarify some basic questions concerning the history of international law such as the relationship between legal doctrine and state practice and the reconsideration of methodological differences among historical figures like Grotius Pufendorf and Vattel It also covers some fundamental problems of international law generally such as the meaning of positivism and positive law and the function of reason The work comprises three main parts the construction of Van Bynkershoek s general theory of the law of nations an overview and analysis of the contemporary practice relevant to his theories on the laws of neutral commerce and the genealogy of Van Bynkershoek s works namely his relation to Grotius and to his later generations of publicists Scholars and others interested in the past and future direction of international law as a whole will not want to miss this highly original offering Special Features of the UN Model Convention Anna Binder,Viktoria Wöhrer,2019-10-01 Detailed research on the

UN Model Convention's unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master's theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD's BEPS project on the UN Model the OECD's BEPS project on the UN Model
