Claus En Kaan Buildings:

Claus en Kaan Architecten Claus en Kaan Architecten (Nederland),2009 *Residential Buildings* Günter Pfeifer,Per Brauneck,2015-04-28 The systematic development of building types is an important task in housing construction A deeper understanding of the underlying building types is mandatory both for individual designs and for the wider application and variation of tried and tested structures The authors have developed an innovative drawing based approach for unfolding the potentials of several existing building types for the future of urban housing The first part is dedicated to the courtyard house in which the courtyard is used as a private outside living space The second part deals with the popular form of the terraced house and discusses aspects of corner solutions or terraced developments as an urban design element In the third part the townhouse is discussed with view to variants such as single story and apartment buildings including aspects of privacy and public access as well as living and working Finally the detached house type is considered in its potential to provide all directional orientation of the living space The array of solutions is presented consistently in floorplans and cross sections drawn to scale In a new introduction to this all in one compendium the authors discuss the implications of the typological approach for today s housing design 田田田田 ,2003 *The New Architectural Pragmatism* William S. Saunders,2007 In response to the contentious process surrounding the selection of a design for the World Trade Center site the use of spectacular buildings to brand cities and institutions and the dizzying transformations of the skylines of Shanghai and Dubai public awareness of architecture and design has perhaps never been higher At the same time architecture itself is undergoing an identity crisis as it confronts fundamental issues the effect of digital technology on design the pervasive impact of global capitalism and whether to embrace or resist popular media and taste The New Architectural Pragmatism collects the most provocative penetrating and influential attempts by leading theorists and practitioners in the field to define what architectural practice should be at the beginning of the twenty first century Written in the aftermath of modernism s utopian impulse and postmodernism s detached playfulness the essays gathered here express and critique a new spirit of cultural and political engagement with contemporary society Interrogating the architect s social responsibility the contributors deliberate about how much we should ask of architecture and suggest that in the coming century architecture must be at once flexible and robust responsive and self directed Contributors Stan Allen George Baird Lucy Bullivant James Corner Hal Foster Kenneth Frampton K Michael Hays Dave Hickey Robert Levit Evonne Levy Reinhold Martin Jorge Silvetti Robert Somol Philippe Starck Roemer van Toorn Sarah Whiting Alejandro Zaera Polo William S Saunders is editor of Harvard Design Magazine and assistant dean for external relations at Harvard University s Graduate School of Design He is the editor of four previous Harvard Design Magazine Readers published by Minnesota In Detail, Work Environments Christian Schittich,2012-12-10 The requirements confronting our workplaces have recently undergone a dramatic transformation Constantly shifting workspace populations and varying uses of workspace call for flexible spatial structures and so do new

professions and innovative working methods The planning of workspaces is influenced by the digitalization of our storage media as well as by new materials and building technologies And yet for all the importance of flexibility and technology the ultimate focus is still on human beings How then can the multilayered concepts of indoor climate lighting acoustics and ergonomics be reconciled with spatial structures that lend themselves to a variety of uses In keeping with the typological approach of the series this volume of the series In Detail presents the various work environments organized according to use The focus throughout is on the successful interplay between technical standards organizational structures and human needs

Cost-Effective Building Christian Schittich, 2012-12-17 This latest volume in the In Detail series turns the spotlight on projects otherwise overshadowed by the spectacular and extravagant buildings that fill the specialist journals unvarnished unpretentious buildings that despite tight budgets are clearly worked out to the last detail They exemplify how and by what measures cost effective planning and building are possible Because cost effective building requires that special attention be paid to the overall planning and implementation these processes are examined comprehensively in specialist contributions and project documentations from office organization through the design phase and the coordination of implementation planning on to ultimate realization The spectrum of solutions extends from the use of standardized products to innovative and individual solutions for details complete with specified costs and is a source of inspiration for architects and planners
