Climate Change and Adaptation Neil Leary, James Adejuwon, Vicente Barros, Ian Burton, Jyoti Kulkarni, Rodel Lasco, 2012-05-04 This book provides valuable lessons that will improve public policy and the quality of decisions that will affect generations to come Richard Moss Senior Director Climate and Energy United Nations Foundation An excellent addition to the body of knowledge on adaptation to climate change from the developing world which has been largely missing until now Saleemul Huq Director Climate Change Programme International Institute for Environment and Development This important volume is a valuable effort on adaptation to climate change that needs to be on the desks of those seeking coping strategies for longer term responses to evolving climate changes Roger Kasperson Emeritus Clark University USA The IPCC winner of the Nobel Peace Prize for 2007 makes clear that while climate change mitigation is vital the world must also begin to adapt But how best can this be achieved This authoritative volume along with its companion on vulnerability resulting from the work of the Assessments of Impacts and Adaptations to Climate Change AIACC project launched with the IPCC in 2002 is the first to provide an in depth investigation of the stakes in developing countries It covers current practices for managing climate risks deficits between current practices and needs the changing nature of the risks due to human caused climate change strategies for adapting to changing risks and the need to integrate these strategies into development planning and resource management The book also identifies obstacles to effective adaptation and explores measures needed to create conditions that are favourable to climate change adaptation Published with TWAS and START

Climate Change Adaptation and International Development Ryo Fujikura, Masato Kawanishi, 2012-07-26 Climate change impacts upon the world's poorest most heavily It is therefore essential that international development initiatives focus on improving the ability of developing countries to adapt to the effects of climate change This book a product of research by the JICA RI Research Institute of the Japan International Cooperation Agency examines climate change adaptation from the perspective of development cooperation in order to provide useful lessons for those engaged in research policy and practice in this vital area In this book the editors have brought together a wide range of case studies from across Africa and Asia covering urban and rural areas and different sectors including water agriculture and disaster management in order to examine the following

- o high resolution climate change projection in Asia and how this can be used in planning appropriate adaptation responses
- o in depth case studies of climate change projections social economic and environmental impact and vulnerability assessment and adaptation in rural Thailand and urban Philippines
- o cases across Africa for which climate data is less readily available and alternative approaches need to be adopted
- o the current situation amongst international donors
- o emerging issues caused by climate change

In the introductory section the editors draw together the full implications from the case studies to discuss how international communities can support adaptation in developing countries and to give an assessment of bilateral projects They reflect on the lessons learned and offer recommendations for future research and international development
