The Risk of Reading Robert P. Waxler, 2014-09-25 *The Risk of Reading* is a defense of the idea that deep and close readings of literature can help us to understand ourselves and the world around us It explores some of the meaning and implications of modern life through the deep reading of significant books Waxler argues that we need fiction to give our so called real life meaning and that reading narrative fiction remains crucial to the making of a humane and democratic society Beginning by exploring the implications of thinking about the importance of story in terms of real life *The Risk of Reading* focuses on the importance of human language especially language shaped into narrative and how that language is central to the human quest for identity Waxler argues that we are linguistic beings and that reading literary narrative is a significant way to enrich and preserve the traditional sense of human identity and knowledge This is especially true in the midst of a culture which too often celebrates visual images spectacle electronic devices and celebrity Reading narrative in other words should be considered a counter cultural activity crucial on the quest to know thyself Reading literature is one of the best opportunities we have today to maintain a coherent human identity and remain self reflective individuals in a world that seems particularly chaotic and confusing Each chapter takes up a well known work of nineteenth or twentieth century literature in order to discuss more fully these issues exploring in particular the notion of life as a journey or quest and the crucial relationship between language and our contingent everyday existence Of particular interest along the way is the question of what literary narrative can teach us about our mortality and how stories offer opportunities to reflect on the ambivalent and profound meaning of mortal knowledge

Wigard Daniel F Yezbick and Jing Zhang Monsters seem to be everywhere these days in popular shows on television in award winning novels and again and again in Hollywood blockbusters They are figures that lurk in the margins and so by contrast help to illuminate the center the embodiment of abnormality that summons the definition of normalcy by virtue of everything they are not Samantha Langsdale and Elizabeth Rae Coody s edited volume explores the coding of woman as monstrous and how the monster as dangerously evocative of women femininity the female is exacerbated by the intersection of gender with sexuality race nationality and disability To analyze monstrous women is not only to examine comics but also to witness how those constructions correspond to women s real material experiences Each section takes a critical look at the cultural context surrounding varied monstrous voices embodiment maternity childhood power and performance Featured are essays on such comics as Faith Monstress Bitch Planet and Batgirl and such characters as Harley Quinn and Wonder Woman This volume probes into the patriarchal contexts wherein men are assumed to be representative of the normative universal subject such that women frequently become monsters

Fables of the Law Daniela Carpi, Marett Leiboff, 2016-10-24 The latest development concerning the metaphorical use of the fairy tale is the legal perspective The law had and has recourse to fairy tales in order to speak of the nomos and its subversion of the politically correct and of the various means that have been used to enforce the law Fairy tales are a fundamental tool to examine legal procedures and structures in their many failings and errors Therefore we have privileged the term fables of the law just to stress the ethical perspective they are moral parables that often speak of justice miscarried and justice sought Law and jurists are creators of fables on the view that law is born out of the facts *ex facto ius oritur* so that there is a need for narrative coherence both on the level of the case and the level of legislation or turned the other way around what does it mean if no such coherence is found This is especially of interest given the influx of all kinds of new technologies that are fabulous in themselves and hard to incorporate in traditional doctrinal schemes and thus in the construction of a new reality
