How Architecture Got Its Hump Roger Connah, 2001-04-13 Fables of content and undoing on the current state of architecture In *How Architecture Got Its Hump* Roger Connah explores the interference of other disciplines with and within contemporary architecture He asks whether photography film drawing philosophy and language are merely fashionable props for architectural hallucinations or alibis for revisions of history Or are they a means for widening the site of architecture Connah shows how these disciplines have not only contributed to new developments in architectural theory and practice but have begun to insinuate new possibilities of space Sometimes seamless sometimes awkward like the hump acquired by the camel in one of Rudyard Kipling's *Just So Stories* these disciplines have had their own responsibilities and excesses grafted onto architecture just as architecture has tried to shake off their limitations Taking interference a step further Connah also considers the implications of philosophical incongruity and architectural unrest He asks how architecture loses its head transcends the dead language it now entraps and houses meanings it wants to contest Hardly bleak questions suggests Connah for they point to ways for architecture to rescue itself
