Creating Scientific Controversies Uncertainty Science:

Creating Scientific Controversies David Harker, 2015-10-01 For decades cigarette companies helped to promote the impression that there was no scientific consensus concerning the safety of their product The appearance of controversy however was misleading designed to confuse the public and to protect industry interests Created scientific controversies emerge when expert communities are in broad agreement but the public perception is one of profound scientific uncertainty and doubt In the first book length analysis of the concept of a created scientific controversy David Harker explores issues including climate change Creation science the anti vaccine movement and genetically modified crops Drawing on work in cognitive psychology social epistemology critical thinking and philosophy of science he shows readers how to better understand evaluate and respond to the appearance of scientific controversy His book will be a valuable resource for students of philosophy of science environmental and health sciences and social and natural sciences *Science*

Communication Annette Leßmöllmann, Marcelo Dascal, Thomas Glöner, 2019-12-16 The volume gives a multi perspective overview of scholarly and science communication exploring its diverse functions modalities interactional structures and dynamics in a rapidly changing world In addition it provides a guide to current research approaches and traditions on communication in many disciplines including the humanities technology social and natural sciences and on forms of communication with a wide range of audiences **The Palgrave Handbook of Philosophy and Public Policy** David

Boonin, 2018-10-08 This book brings together a large and diverse collection of philosophical papers addressing a wide variety of public policy issues Topics covered range from long standing subjects of debate such as abortion punishment and freedom of expression to more recent controversies such as those over gene editing military drones and statues honoring Confederate soldiers Part I focuses on the criminal justice system including issues that arise before during and after criminal trials Part II covers matters of national defense and sovereignty including chapters on military ethics terrorism and immigration Part III which explores political participation manipulation and standing includes discussions of issues involving voting rights the use of nudges and claims of equal status Part IV covers a variety of issues involving freedom of speech and expression Part V deals with questions of justice and inequality Part VI considers topics involving bioethics and biotechnology Part VII is devoted to beginning of life issues such as cloning and surrogacy and end of life issues such as assisted suicide and organ procurement Part VIII navigates emerging environmental issues including treatments of the urban environment and extraterrestrial environments **The ^A Fight Against Doubt** Inmaculada de Melo-Martín, Kristen Intemann, 2018-07-02

Dissent about widely accepted scientific claims can promote doubt about scientific evidence intimidate scientists stymie research and lead the public and policymakers to oppose needed policies To limit these problems The Fight against Doubt calls for facilitating greater trust between scientists and laypersons and recognizing the limits of science in policymaking

Religious Experience and Its Transformational Power Sabrina Müller, 2023-06-19 The author approaches the phenomenon

religious experience through a qualitative study in which young urban people from Europe and the USA are empirically examined. It becomes clear that individuals themselves are constructive agents of experience and theology. Religious experience manifests itself as a transformative perspective of hope in the lives of young people. The study ends with a plea for a theology from below based on liberation theology and feminist theories in which contextual perspectives are central to practical theological theorising.

Induction, Science, and Morality Seungbae Park, 2025-08-25. This book offers new insights into Hume's problem of induction. In addition to that it argues against the coherentist justification of induction refuting Hume's initial problem of induction and develops counter inductions to defend scientific realism from pessimists and advocates a realist theory of scientific development. In doing so this book enriches the moral realism debate with the scientific realism debate and is of great value to researchers and advanced students in philosophy of science.

The Epistemic Injustice of Genocide Denialism Melanie Altanian, 2024-04-23. The injustice of genocide denial is commonly understood as a violation of the dignity of victims survivors and their descendants and further described as an assault on truth and memory. This book rethinks the normative relationship between dignity truth and memory in relation to genocide denial by adopting the framework of epistemic injustice. This framework performs two functions. First it introduces constructive normative vocabulary into genocide scholarship through which we can gain a better understanding of the normative impacts of genocide denial when it is institutionalized and systematic. Second it develops and enriches current scholarship on epistemic injustice with a further underexplored case study. Genocide denialism is relevant for political and social epistemology as it presents a substantive epistemic practice that distorts normativity and social reality in ways that maintain domination. This generates pervasive ignorance that makes denial rather than recognition of genocide appear as the morally and epistemically right thing to do. By focusing on the prominent case of Turkey's denialism of the Armenian genocide the book shows the serious consequences of this kind of epistemic injustice for the victim group and society as a whole. *The Epistemic Injustice of Genocide Denialism* will appeal to students and scholars working in social political and applied epistemology social and political philosophy genocide studies Armenian studies and memory studies. Evidence Contestation Karin Zachmann, Mariacarla Gadebusch Bondio, Saana Jukola, Olga Sparschuh, 2023-02-21. This book examines the practices of contesting evidence in democratically constituted knowledge societies. It provides a multifaceted view of the processes and conditions of evidence criticism and how they determine the dynamics of de and re stabilization of evidence. Evidence is an essential resource for establishing claims of validity resolving conflicts and legitimizing decisions. In recent times however evidence is being contested with increasing

frequency Such contestations vary in form and severity from questioning the interpretation of data or the methodological soundness of studies to accusations of evidence fabrication The contributors to this volume explore which actors for what reasons and to what effect question evidence in fields such as the biological environmental and health sciences In addition to actors inside academia they examine the roles of various other players including citizen scientists counter experts journalists patients consumers and activists The contributors tackle questions of how disagreements are framed and how they are used to promote vested interests By drawing on methodological and theoretical approaches from a wide range of fields this book provides a much needed perspective on how evidence criticism influences the development and state of knowledge societies and their political condition Evidence Contestation will appeal to scholars and advanced students working in philosophy of science epistemology bioethics science and technology studies the history of science and technology and science communication
