Datawars The Politics Of Modeling In Federal Policymaking:

Organizations and Communication Technology Janet Fulk, Charles W. Steinfield, 1990-03-01 Organizations and Communications Technology is must reading for those interested in the relation of communication technology to organizational form and function The book does what many such collections do not do It presents in a complementary if not totally unified fashion a variety of perspectives on and answers to questions raised about the essential nature determinants and effects of the organization communication technology interface Such coherence in theme and structure is not accidental rather it derives from the editors commitment to a robust theoretical foundation in which to ground past and future research They have succeeded brilliantly in their efforts to focus substantive scholarship on theory building in a data rich but theory poor field The result is a work that will no doubt be a classic The reader who makes the commitment to mine its essays will not be disappointed Journal of Business and Technical Communication As a summary of the field this collection of theoretical essays succeeds on two main counts First it brings together in one volume writers whose recent work has been widely cited and discussed throughout the literatures of information science communication management and technology studies Second the book presents some exciting theoretical ideas about the relationship between communication technologies and social behavior that are applicable beyond the organizational setting On the whole this book is a fine overview that updates and lends structure organizes this evolving literature for a diverse audience Journal of Communication The editors argue convincingly that the study of human and organizational aspects of communications technology suffers from a glut of data and a deficiency of theory The objective of the book becomes one of starting the process of developing a corpus of theory that will integrate the knowledge we have Overall the book achieves this objective well with the gratifying addition that there are also plenty of practical recommendations of immediate value to the practitioner This is an ambitious book and given the importance of the topic this is inevitable It is aimed at a broad range of disciplines It is unashamedly theoretical in its approach yet contains a good deal of immediate practical importance My own prediction suggests that this book will be regarded as a milestone from which future progress will be measured The Occupational Psychologist Communications technology offers a wonderful springboard for much broader considerations of how people in organizations and behavior within them Worthwhile engaging Academy of Management Review Will interest any business communication scholar concerned with the ways organizations are affected by new technologies Provide s a wealth of stimulating ideas Journal of Business Communication Organizations and Communications Technology is an attempt to provide a foundation for theory development on information technology in organizations by delegating the task to a set of competent researchers and theorists Given the dearth of theory development in the field such a strategy makes some sense Because of its diversity organizations communications and management information systems scholars should all find something of interest Administrative Science Quarterly How do technology and organization interact to shape organizational structures and

processes What organizational political and social processes constrain technological development What forces shape the articulation of organizational and technological systems Answering these and other pivotal questions this powerful volume centers on the role of theory for advancing our knowledge of communication technology in organizations at several levels micro group and macro A distinguished team of contributors examines a richly diverse group of topics including telecommunications communication networks and new media the use of group decision support systems and discretionary databases to name but a few Organizations and Communication Technology offers nothing less than a fresh foundation for research and management practice As such it is essential reading for scholars practitioners and students in the fields of management studies communication science organization studies and policy studies *The Psychology of Counterfactual Thinking* David R. Mandel, Denis J. Hilton, Patrizia Catellani, 2007-05-07 This book provides a critical overview of significant developments in research and theory on counterfactual thinking that have emerged in recent years and spotlights exciting new directions for future research in this area Key issues considered include the relations between counterfactual and casual reasoning the functional bases of counterfactual thinking the role of counterfactual thinking in the experience of emotion and the importance of counterfactual thinking in the context of crime and justice International Perspectives on Information Systems Savvas Katsikdes, Graham Orange, 2018-10-26 First published in 1998 this book addresses the increasingly important social and organisational issues of information systems development both at the operational level and within a wider social context Reflecting the environmental issues surrounding the development of information systems and the implementation of information technology This book is aimed at supporting information systems courses incorporating a behavioural element or sociology courses with an information systems content *Personnel Literature* , 1989 Scholarly Publishing Robin P. Peek, Gregory B. Newby, 1996 An examination of the critical issues facing universities academics libraries and scholarly presses at a time when publishing has begun moving from a print to an electronic paradigm The essays explore the technical social and organizational impact of computer mediated communication **Sorting Things Out** Geoffrey C. Bowker, Susan Leigh Star, 2000-08-25 A revealing and surprising look at how classification systems can shape both worldviews and social interactions What do a seventeenth century mortality table whose causes of death include fainted in a bath frightened and itch the identification of South Africans during apartheid as European Asian colored or black and the separation of machine from hand washables have in common All are examples of classification the scaffolding of information infrastructures In *Sorting Things Out* Geoffrey C Bowker and Susan Leigh Star explore the role of categories and standards in shaping the modern world In a clear and lively style they investigate a variety of classification systems including the International Classification of Diseases the Nursing Interventions Classification race classification under apartheid in South Africa and the classification of viruses and of tuberculosis The authors emphasize the role of invisibility in the process by which classification orders human interaction They examine how categories are made and kept invisible and how people can change this invisibility when

necessary They also explore systems of classification as part of the built information environment Much as an urban historian would review highway permits and zoning decisions to tell a city's story the authors review archives of classification design to understand how decisions have been made *Sorting Things Out* has a moral agenda for each standard and category valorizes some point of view and silences another Standards and classifications produce advantage or suffering Jobs are made and lost some regions benefit at the expense of others How these choices are made and how we think about that process are at the moral and political core of this work The book is an important empirical source for understanding the building of information infrastructures

Computerization and Controversy Rob Kling, 1996-02-28 The Second Edition of *Computerization and Controversy: Value Conflicts and Social Choices* is a collection of 78 articles that examine the social aspects of computerization from a variety of perspectives many presenting important viewpoints not often discussed in the conventional literature A number of paired articles comprise thought provoking head on debate Fields represented include computer science information systems management journalism psychology law library science and sociology This volume introduces some of the major controversies surrounding the computerization of society and helps readers recognize the social processes that drive and shape computerization Division into eight provocatively titled sections facilitates course planning for classroom or seminar use A lead article for each section frames the major controversies locates the selections within the debates and points to other relevant literature A fully revised and updated version of the first anthological treatment of the subject Organized to facilitate course planning for classroom or seminar use Provides coverage of the influence of computers on a wide variety of fields including computer science information systems management journalism psychology law library science and sociology

Andersen, 1995 This text investigates the nature of impacts of information systems on the political world in the First World countries The overall aim is to provide a framework on how to analyze implications of information technology IT on the political world and vice versa This is illustrated by a study of economic modelling at the central and local levels of government

Assessment of Non-Point Source Pollution in the Vadose Zone Dennis L. Corwin, Keith Loague, Timothy R. Ellsworth, 1999-01-26 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 108 Non point source NPS pollution in the vadose zone simply defined as the layer of soil extending from the soil surface to the groundwater table is a global environmental problem Characteristically NPS pollutants are widespread and occasionally ubiquitous in extent thus making remediation efforts difficult and complex have the potential for maintaining a relatively long active presence in the global ecosystem and may result in long term chronic health effects in humans and other life forms Similar to other global environmental issues the knowledge and information required to address the problem of NPS pollutants in the vadose zone cross several technological and subdisciplinary lines spatial statistics geographic information systems GIS hydrology soil science and remote sensing Cooperation between disciplines and scientific societies is essential to address the problem

Evidence of such cooperation was the jointly sponsored American Geophysical Union Chapman Soil Science Society of America SSSA Outreach Conference that occurred in October 1997 entitled Applications of GIS Remote Sensing Geostatistics and Solute Transport Modeling to the Assessment of Non Point Source Pollution in the Vadose Zone The objective of the conference and this book which was developed from the conference was to explore current multidisciplinary research for assessing NPS pollution in soil and groundwater resources E-Government Research: Policy and Management Norris, Donald, 2007-12-31 Virtual technology is increasingly prevalent in all spheres of daily life including infiltration into governmental policies processes infrastructures and frameworks E Government Research Policy and Management provides scholars and practitioners with a critical mass of research on the integration management implications and application of e government Covering such issues as e government adoption and diffusion social and performance issues of e government and information security privacy and policy this book is an essential resource to any library collection
