

CA Endevor Software Change Manager Version 18.0.04

At a Glance

As the app economy continues to rely on mainframes as systems of record, a proven and reliable approach to securing and managing those assets is more critical than ever. Beginning with the first line of modified code through continuous build and deploy, demonstrating audit compliance, mandating test states and tracking change with strict authorization qualifications are essential for a successful release. CA Endevor® Software Change Manager (CA Endevor SCM) is designed to facilitate the software change process and naturally address DevOps challenges by governing agile processes and streamlining deployments, allowing for continuous delivery of software that helps differentiate and grow your business.

Key Benefits/Results for Personnel

- **Extends separation of duties and audit to further reduce risk.** Provides administrator traceability with conflict-of-interest user identifications.
- **Refines role-based security to decentralize administration.** Extends functions to developers.
- **Facilitates productivity.** Java System Services and Natural Developers gain streamlined functions.

Key Stories

- **Approver disqualification option.** Identifies and disqualifies conflict change participants from authorization capabilities.
- **After action file-level security** restricts the use of the metadata change utility in a controlled fashion.
- **User interface fine-tuning** helps you better manage USS software artifacts.
- **CA Endevor integration for the Natural environment usability enhancements** offers advice-defined default options, Object Load/Unload values and a quick-find display that improves Natural developer efficiencies.
- **Web services installation and configuration enhancements** are simplified and augmented with programmatic configuration and installation validation.
- **Agile delivery rollout** enables all previously published feature sets and maintenance to be available for installation.

Why Customers Asked for This

Administrator SMF capture and approver disqualification helps you use software change control to address the latest guidelines for auditors. Administrator traceability with comprehensive identification and restriction of conflict-of-interest assets from change authorization solidifies the compliance and control assistance capabilities of CA Endevor SCM.

With the adoption of agile practices, extending **role-based security** to include **after action** empowers developers to make refinements to change-set metadata to more quickly align to requirements associated with iterative development.

Mainframe Java® developers and Natural developers want the same experience as COBOL developers. Refinements to the native CA Endevor SCM **user interface** allow for uniform management of USS file structures, while new options help streamline the SCM process for Natural developers.

The **agile rollout** includes an incremental release identifier which facilitates easier management of software upgrades and maintenance for customers eager to adopt the continuous delivery model inherent in CA Endevor SCM.

What Customers Say

"When can I get my hands on the UI enhancements for Java processing? This is going to have a positive impact for our development staff."

"The approver disqualification does a great job of comprehensively achieving our most recent audit requirements."

"We're looking forward to extending more functionality to developers that keeps them delivering in an agile fashion."

"The new continuous delivery and associated identification helps us as an organization to stay current and communicate that we are current with CA Endevor SCM releases."
