Communicative Sexualities A Communicology Of Sexual Experience:

Communicative Sexualities Jacqueline M. Martinez, 2011-07-16 *Communicative Sexualities Queer and Feminist Theories in Practice* by Jacqueline M Martinez provides an argument for and illustration of how to pursue the direct study of students lived experiences of sexuality in a classroom or academic setting It illustrates how communicology and its methodological practice of semiotic phenomenology allows for a sustained and rigorous study of the meaningfulness of sexual experience as it becomes manifest in the immediate concrete and embodied realities in the lives of those taking up such a study The generous use of extended examples from actual classroom experience allows for a detailed consideration of the applied research methodology as well as the ethical issues involved in making students lived experience of sexuality the main subject matter of the course A major concern of *Communicative Sexualities* is to make explicit the many presuppositions about sex gender and sexuality that students and professors bring into the classroom Martinez s text features detailed discussions of how to study lived experience sexuality as the subject matter of research It considers the steps necessary in suspending presuppositions regarding sexuality and gender and focuses particular attention on the many presuppositions associated with the heterosexual homosexual binary Sexuality is understood as inherently good yet also capable of becoming a means of perpetuating human isolation and degradation as much as an experience of tremendously shared human intimacy and mutual recognition Discussions of historical context the fact of temporality and the intersection of person and culture provide a basis for explicit discussions of semiotics and phenomenology in communicology As an introductory text *Communicative Sexualities Queer and Feminist Theories in Practice* by Jacqueline M Martinez is an excellent primer for the advanced study of communicology and semiotic phenomenology It one of very few texts that provides both a theoretical or philosophical discussion of phenomenology with the study of sexuality and gender as an explicit subject matter

Sexual Rhetorics Jonathan Alexander, Jacqueline Rhodes, 2015-10-16 Sexual rhetoric is the self conscious and critical engagement with discourses of sexuality that exposes both their naturalization and their queering their torquing to create different or counter discourses giving voice and agency to multiple and complex sexual experiences This volume explores the intersection of rhetoric and sexuality through the varieties of methods available in the fields of rhetoric and writing studies including case studies theoretical questioning ethnographies or close and distant readings of texts that help us think through the rhetorical force of sexuality and the sexual force of rhetoric

Embodiment in the Semiotic Matrix Isaac E. Catt, 2017-09-22 Communicology is widely accepted on the international scene as a new name for the study of human communication It replaces several equivocal disciplinary conceptions such as communication which may fail to distinguish the science of communication from its object of investigation or the message centered communication studies which often obfuscates information exchange with the experience of shared meaning in human encounters Communicology differs from the American mainstream social science of communication not only because it is grounded in communication theory rather than

information theory but also because it advances a philosophically informed ecological perspective on human discourse This book is intended as a contribution to the philosophy of communication and the human science of communicology Semiotic phenomenology is thoroughly described as the synthetic logic that combines a philosophy of consciousness with a science of culture and conduct to explicate the lifeworld habitus Consciousness is viewed as cultural semiotic and experience as personal phenomenological This is a reciprocal reflexive relationship in which culture is conceived as consciousness of communication and communication the manifest experience of culture The book describes embodiment so conceived including the history of the matrix idea in American pragmatism and European philosophy as they commingled in the United States to produce a unique discipline of communication the science of embodied discourse Important roots of this new discipline are described for the first time here in a unique synthesis of C S Peirce John Dewey Gregory Bateson and Pierre Bourdieu In addition the semiotic relativity hypothesis is argued to be an important implication of this new discipline Transcending the stale debate on language and thought the limited conception of linguistic relativity is considerably broadened and deepened The distinctive lifeworld of humans is argued to occur at the threshold of sign consciousness in the semiotic matrix of culture society person Semiotic phenomenology is not only a synthesis of two great European philosophical movements structuralism and phenomenology it is also the essence of American pragmatism This view culminates in the contemporary human science of communicology

Billard, Silvio Waisbord, 2024-03-26 Prometheus brought the gift of enlightenment to humanity and suffered for his benevolence This collection takes on scholars' Promethean view of themselves as selfless bringers of light and instead offers a new vision of public scholarship as service to society Thomas J. New Understandings of Twin Relationships Barbara Klein, Stephen A. Hart, Jacqueline M. Martinez, 2020-12-23 *New Understandings of Twin Relationships* takes an experience based approach to exploring how twin attachment and estrangement are critical to understanding the push and pull of closely entwined personal relationships Based on the research expertise of each of the authors all identical twins in their own right and vignettes from twins across the globe this book describes the inner workings of the twin world showing how the twin world creates experiences that are often more intense and intricately textured than those in the singleton world Chapters debunk myths surrounding twinship and analyze the developmental stages of the twin relationship as well as the effect of being a twin on one's mental health from different perspectives The authors articulate how attachment separation anxiety loneliness estrangement and the subjective experience of the twin and non twin other impact behavior thinking and feeling Through its careful study of the many psychological challenges that twins face throughout their lifetime this text will help psychologists scholars clinicians and twins themselves attain a deeper understanding of all interpersonal relationships

In-Between Mariana Ortega, 2016-03-14 This original study intertwining Latina feminism existential phenomenology and race theory offers a new philosophical approach to understanding selfhood and identity Focusing on writings by Gloria Anzaldúa María Lugones and Linda Martín Alcoff Mariana Ortega articulates a phenomenology that introduces a conception of selfhood as both multiple and singular Her Latina feminist phenomenological approach can account for identities belonging simultaneously to different worlds including immigrants exiles and inhabitants of borderlands Ortega's project forges new directions not only in Latina feminist thinking on such issues as borders mestizaje marginality resistance and identity politics but also connects this analysis to the existential phenomenology of Martin Heidegger and to such concepts as being in the world authenticity and intersubjectivity The pairing of the personal and the political in Ortega's work is illustrative of the primacy of lived experience in the development of theoretical understandings of who we are In addition to bringing to light central metaphysical issues regarding the temporality and continuity of the self Ortega models a practice of philosophy that draws from work in other disciplines and that recognizes the important contributions of Latina feminists and other theorists of color to philosophical pursuits
