Communities of Science in Nineteenth-Century Ireland Juliana Adelman, 2016-09-12 The nineteenth century was an important period for both the proliferation of popular science and for the demarcation of a group of professionals that we now term scientists Of course for Ireland largely in contrast to the rest of Britain the prominence of Catholicism posed various philosophical questions regarding research Adelman's study examines the practical educational impact of the growth of science in these communities and the impact of this on the country's economy the role of museums and exhibitions in spreading scientific knowledge and the role that science had to play in Ireland's turbulent political context Adelman challenges historians to reassess the relationship between science and society showing that the unique situation in Victorian Ireland can nonetheless have important implications for wider European interpretations of the development of this relationship during a period of significant change

Making Ireland Modern Enda Delaney, 2025-10-02 A provocative and original reinterpretation of modern Irish history There is a widespread misconception that Ireland became modern much later than its neighbours in the 1960s and 1970s This is grounded in several enduring stereotypes and caricatures of Ireland as a timeless and unchanging land of saints and scholars of its society and culture in the long nineteenth century as puritanical regressive or archaic of Gaelic language and culture as backward or inward looking in contrast to a modern English counterpart and of the island as natural and rural in the face of the urban and technological progress of modernity Drawing on an extensive range of sources from poetry and novels to contemporary

historical documents acclaimed historian Enda Delaney here offers a reinterpretation of Ireland's encounter with modernity that corrects these stereotypes By situating the island's history between 1780 and 1916 within its broader European global and colonial contexts he demonstrates that Ireland's pathway to modernity was not inevitable belated or uni directional over a complex and centuries long process it was made modern and in its own distinctive way This was related to but distinct from Ireland's complicated colonial relationship with Britain and played out in the broader contexts of globalisation and the rise of capitalism And at the heart of this history are the Irish people themselves both those who lived on the island and the millions of those who left during this period and made their lives in Britain America Australia and beyond who made sense of modernity in a variety of conflicting ways and in so doing sought to shape their own destinies and adapt the old ways of doing things in the face of relentless waves of progress Changes in values consciousness and beliefs interacted with broader social political and cultural revolutions to create a distinctive experience of becoming modern The result is a bold and wide ranging new history of modern Ireland that restores agency to those who lived and made its history raising important and timely questions about modernity globalisation modern history and post colonialism *Civilised by beasts* Juliana

Adelman,2020-10-27 *Civilised by beasts* tells the story of nineteenth century Dublin through human animal relationships It offers a unique perspective on ordinary life in the Irish metropolis during a century of significant change and reform At its heart is the argument that the exploitation of animals formed a key component of urban change from municipal reform to class formation to the expansion of public health and policing It uses a social history approach but draws on a range of new and underused sources including archives of the humane society and the zoological society popular songs visual ephemera and diaries The book moves chronologically from 1830 to 1900 with each chapter focusing on specific animals and their relationship to urban changes It will appeal to anyone fascinated by the history of cities the history of Dublin or the history of Ireland

The Oxford Handbook of Religion in Modern Ireland Gladys Ganiel,Andrew R. Holmes,2024 This volume offers a range of sociological political and historical perspectives on religion in Ireland from 1800 to the present Going beyond the usual Catholicism Protestantism dichotomy and adopting an all island approach the book's contributors address religion's interaction with several contemporary themes and debates in modern Ireland **The Science of History in Victorian**

Britain Ian Hesketh,2016-09-12 New attitudes towards history in nineteenth century Britain saw a rejection of romantic literary techniques in favour of a professionalized scientific methodology The development of history as a scientific discipline was undertaken by several key historians of the Victorian period influenced by German scientific history and British natural philosophy This study examines parallels between the professionalization of both history and science at the time which have previously been overlooked Hesketh challenges accepted notions of a single scientific approach to history Instead he draws on a variety of sources monographs lectures correspondence from eminent Victorian historians to uncover numerous competing discourses **Regionalizing Science** Simon Naylor,2016-09-12 Victorian England as is well known produced an

enormous amount of scientific endeavour but what has previously been overlooked is the important role of geography on these developments Naylor seeks to rectify this imbalance by presenting a historical geography of regional science Taking an in depth look at the county of Cornwall questions on how science affected provincial Victorian society how it changed people s relationship with the landscape and how it shaped society are applied to the Cornish case study allowing a depth and texture of analysis denied to more general scientific overviews of the period

Popular Exhibitions, Science and Showmanship, 1840-1910 Joe Kember, John Plunkett, Jill A. Sullivan, 2016-09-12 Victorian culture was characterized by a proliferation of shows and exhibitions These were encouraged by the development of new sciences and technologies together with changes in transportation education and leisure patterns The essays in this collection look at exhibitions and their influence in terms of location technology and ideology

Vision, Science and Literature, 1870-1920 Martin Willis, 2015-07-22 This book explores the Victorian concept of vision across scientific and cultural forms Willis charts the characterization of vision through four organizing principles small large past and future to arrive at a Victorian conception of what vision was Willis then explores how this Victorian vision influenced twentieth century ways of seeing
