Una breve historia del derecho europeo Tamar Herzog, 2019-04-18 Una breve historia del derecho europeo recorre los últimos dos mil quinientos años desde los orígenes del derecho romano hasta las últimas transformaciones del derecho comunitario de la actual Unión Europea. Incide en los periodos y momentos de intensa transformación de la realidad jurídica de los que proceden nuestras instituciones y leyes actuales y señala los puntos clave para entender de qué se trata cuando hablamos del derecho y de dónde viene el derecho que nos gobierna. Herzog describe cómo los sucesivos ordenamientos jurídicos europeos se fundamentaron unos en otros desde la Antigüedad hasta la creación y ampliación de la Unión Europea. El derecho romano formaba la espina dorsal de cada configuración aunque la manera en que se interpretaba utilizaba y rehacía variaba considerablemente de un siglo y lugar a otro. Solo al considerar conjuntamente el derecho civil continental y el common law inglés vemos cómo se basaron en esta tradición compartida y la enriquecieron ampliando la definición de Europa para incluir sus dominios coloniales. Herzog explica que los imperios británico y español del Nuevo Mundo no solo fueron receptores de las tradiciones jurídicas europeas sino también incubadores de nuevas ideas. Sus experiencias además de la tensión constante entre las ideas innovadoras y el localismo ingenuo explican de qué modo el derecho europeo se rehizo a sí mismo como el epítome de la razón y como un sistema con aplicaciones potencialmente globales. Una breve historia del derecho europeo articulando la compleja relación entre los acontecimientos políticos y sociales y las soluciones jurídicas concebidas para tratarlos, ayudar a entender los orígenes de conceptos e instituciones legales esenciales de nuestros días a comprender a través de sus sistemas legales lo que es Europa.

Revolutionizing a World Mark Altaweel, Andrea Squitieri, 2018-02-15 This book investigates the long term continuity of large scale states and empires and its effect on the Near East's social fabric including the fundamental changes that occurred to major social institutions. Its geographical coverage spans from east to west modern day Libya and Egypt to Central Asia and from north to south Anatolia to southern Arabia incorporating modern day Oman and Yemen. Its temporal coverage spans from the late eighth century BCE to the seventh century CE during the rise of Islam and collapse of the Sasanian Empire. The authors argue that the persistence of large states and empires starting in the eighth seventh centuries BCE which continued for many centuries led to new socio political structures and institutions emerging in the Near East. The primary processes that enabled this emergence were large scale and long distance movements or population migrations. These patterns of social developments are analysed under different aspects: settlement patterns, urban structure, material culture, trade, governance, language spread and religion, all pointing at movement as the main catalyst for social change. This book's argument is framed within a larger theoretical framework termed as universalism, a theory that explains many of the social transformations that happened to societies in the Near East starting from the Neo Assyrian period and continuing for centuries. Among other influences the effects of these transformations are today manifested in modern languages, concepts of government, universal religions and monetized and globalized economies.
