The Roots of Flower City Camden Burd,2024-10-15 In The Roots of Flower City Camden Burd explores the economic and ecological significance of Rochester plant nurserymen over the course of the nineteenth century As the first boomtown in the United States Rochester was an embodiment of nineteenth century market economies and social reform movements Connected to the eastern seaboard by the Erie Canal the city s unique economic cultural and environmental conditions fostered and sustained a vast and influential commercial plant nursery industry that attracted the nation s most prominent horticulturists and nurserymen Rochester area nurserymen built parks and rural cemeteries landscaped homes and schools and promoted horticultural pursuits regionally and nationally As their influence grew many of these horticultural entrepreneurs developed into the city s elite and played a leading role in shaping Rochester s economic social and physical landscape Most significantly nurserymen enthusiastically participated in the American imperial project selling and distributing fruit shade and ornamental trees shrubs and flowers across the continent transforming landscapes and ecologies far beyond New York The Roots of Flower City tells the remarkable history of Rochester s outsized influence on the homes estates towns and cities of nineteenth century America as it weathered economic downturns and competition from other regions One threat however proved to be too much to overcome As Burd details the spread of the destructive San Jose scale through the transcontinental plant trade prompted federal legislation that would lead to the decline of the Rochester plant nursery industry in the last decade of the nineteenth century ending a sustained era of success and ecological impact

Architects of an American Landscape Hugh Howard,2022-01-25 A dual portrait of America s first great architect Henry Hobson Richardson and her finest landscape designer Frederick Law Olmsted and their immense impact on America As the nation recovered from a cataclysmic war two titans of design profoundly influenced how Americans came to interact with the built and natural world around them through their pioneering work in architecture and landscape design Frederick Law Olmsted is widely revered as America s first and finest parkmaker and environmentalist the force behind Manhattan s

Central Park Brooklyn's Prospect Park Biltmore's parkland in Asheville dozens of parks across the country and the preservation of Yosemite and Niagara Falls Yet his close friend and sometime collaborator Henry Hobson Richardson has been almost entirely forgotten today despite his outsized influence on American architecture from Boston's iconic Trinity Church to Chicago's Marshall Field Wholesale Store to the Shingle Style and the wildly popular open plan he conceived for family homes Individually they created much beloved buildings and public spaces Together they married natural landscapes with built structures in train stations and public libraries that helped drive the shift in American life from congested cities to developing suburbs across the country The small reserved Olmsted and the passionate Falstaffian Richardson could not have been more different in character but their sensibilities were closely aligned In chronicling their intersecting lives and work in the context of the nation's post war renewal Hugh Howard reveals how these two men created original all American idioms in architecture and landscape that influence how we enjoy our public and private spaces to this day *The Atlas of Boston*

History Nancy S. Seasholes, 2019-10-10 Few American cities possess a history as long rich and fascinating as Boston's A site of momentous national political events from the Revolutionary War through the civil rights movement Boston has also been an influential literary and cultural capital From ancient glaciers to landmaking schemes and modern infrastructure projects the city's terrain has been transformed almost constantly over the centuries The Atlas of Boston History traces the city's history and geography from the last ice age to the present with beautifully rendered maps Edited by historian Nancy S Seasholes this landmark volume captures all aspects of Boston's past in a series of fifty seven stunning full color spreads Each section features newly created thematic maps that focus on moments and topics in that history These maps are accompanied by hundreds of historical and contemporary illustrations and explanatory text from historians and other expert contributors They illuminate a wide range of topics including Boston's physical and economic development changing demography and social and cultural life In lavishly produced detail The Atlas of Boston History offers a vivid refreshing perspective on the development of this iconic American city Contributors Robert J Allison Robert Charles Anderson John Avault Joseph Bagley Charles Bahne Laurie Baise J L Bell Rebekah Bryer Aubrey Butts Benjamin L Carp Amy D Finstein Gerald Gamm Richard Garver Katherine Grandjean Michelle Granshaw James Green Dean Grodzins Karl Haglund Ruth Ann M Harris Arthur Krim Stephanie Krueel Kerima M Lewis Noam Maggor Dane A Morrison James C O Connell Mark Peterson Marshall Pontrelli Gayle Sawtelle Nancy S Seasholes Reed Ueda Lawrence J Vale Jim Vrabell Sam Bass Warner Jay Wickersham and Susan Wilson **The Olmsted National Historic Site and the Growth of Historic Landscape**

Building Schools, Making Doctors Katherine L. Carroll, 2022-05-31 In the late nineteenth century medical educators intent on transforming American physicians into scientifically trained elite professionals recognized the value of medical school design for their reform efforts Between 1893 and 1940 nearly every medical college in the country rebuilt or

substantially renovated its facility In *Building Schools Making Doctors* Katherine Carroll reveals how the schools constructed during this fifty year period did more than passively house a remodeled system of medical training they actively participated in defining and promoting an innovative pedagogy modern science and the new physician Interdisciplinary and wide ranging her study moves architecture from the periphery of medical education to the center uncovering a network of medical educators architects and philanthropists who believed that the educational environment itself shaped how students learned and the type of physicians they became Carroll offers the first comprehensive study of the science and pedagogy formulated by the buildings the influence of the schools donors and architects the impact of the structures on the urban landscape and the local community and the facilities privileging of white men within the medical profession during this formative period for physicians and medical schools
