Crime Prevention David A. Mackey,Kristine Levan,2013 Written by a collection of scholarly experts Crime Prevention presents significant issues related to contemporary crime prevention efforts Interdisciplinary in its approach the text is written for courses within a criminal justice or sociology curriculum Co Editor and author David Mackey begins by emphasizing the importance of crime prevention as it relates to financial and social costs and introduces students to the theoretical models of crime prevention The subsequent order of the chapters parallels the medical model of crime prevention moving from primary crime prevention secondary crime prevention and tertiary crime prevention efforts Traditional areas of crime prevention are reflected in the chapters on family schools guns policing sentencing and correctional programs and additional chapters cover emerging areas now considered critical to crime prevention such as technology surveillance and specific efforts to protect more vulnerable populations Key Features Includes a comprehensive look at the many facets of crime prevention merging both the theory and practice Provides a comprehensive discussion on a range of crime prevention topics while incorporating a theoretical foundation a look at previous research and existing policy analysis Includes the most recent data in the field acknowledging the recent changes in crime prevention due to increased awareness of terrorism and advances in technological capabilities Resources Instructor resources include a complete Test Bank and PowerPoint Lecture Outlines

Driverless Cars, Urban Parking and Land Use Robert A. Simons,2020-02-05 The subject of driverless and even ownerless cars has the potential to be the most disruptive technology for real estate land use and parking since the invention of the elevator This book includes new research and economic analysis plus a thorough review of the current literature to pose and attempt to answer a number of important questions about the effect that driverless vehicles may have on land use in the United States especially on parking Simons outlines the history of disruptive technologies in transport and real estate before examining how the predicted changes brought in by the adoption of driverless technologies and decline in car ownership will affect our urban areas What could we do with all the parking areas in our cities and our homes and institutional buildings that may no longer be required Can they be sustainably repurposed Will self driving cars become like horses used only by hobbyists for recreation and sport While the focus is on parking the book also contains the views of real estate economists architects and policymakers and is essential reading for real estate developers and investors transport economists planners politicians and policymakers who need to consider the implications of a future with more driverless vehicles Fasten your seat belt like it or not driverless cars will begin to change the way we move about our cities within ten years
