Cybernetic Revolutionaries Cybernetic Revolutionaries:

Cybernetic Revolutionaries Eden Medina, 2011-10-28 A historical study of Chile's twin experiments with cybernetics and socialism and what they tell us about the relationship of technology and politics Cybernetic Revolutionaries Eden Medina, 2014-01-10 A historical study of Chile's twin experiments with cybernetics and socialism and what they tell us about the relationship of technology and politics In *Cybernetic Revolutionaries* Eden Medina tells the history of two intersecting utopian visions one political and one technological The first was Chile's experiment with peaceful socialist change under Salvador Allende the second was the simultaneous attempt to build a computer system that would manage Chile's economy Neither vision was fully realized Allende's government ended with a violent military coup the system known as Project Cybersyn was never completely implemented but they hold lessons for today about the relationship between technology and politics Drawing on extensive archival material and interviews Medina examines the cybernetic system envisioned by the Chilean government which was to feature holistic system design decentralized management human computer interaction a national telex network near real time control of the growing industrial sector and modeling the behavior of dynamic systems She also describes and documents with photographs the network's Star Trek like operations room which featured swivel chairs with armrest control panels a wall of screens displaying data and flashing red lights to indicate economic emergencies Studying project Cybersyn today helps us understand not only the technological ambitions of a government in the midst of political change but also the limitations of the Chilean revolution This history further shows how human attempts to combine the political and the technological with the goal of creating a more just society can open new technological intellectual and political possibilities Technologies Medina writes are historical texts when we read them we are reading history

Cybernetic Revolution and Global Aging Leonid Grinin, Anton Grinin, Andrey Korotayev, 2024-05-17 This book explores the global technological transformations that have shaped development of society for eons from the emergence of Homo sapiens to the modern day Looking at a potential future for all of this century and the beginning of the next the book explores how society is changing as a result of the two most powerful trends technological advances and global aging It studies the forthcoming technological wave the Cybernetic Revolution which will encompass AI medical technology and biotechnology robotics cognitive nanotechnology etc In turn it shows why and how global aging will become one of the most powerful factors influencing the evolution of society and the World System as a whole Lastly the book demonstrates how technological innovations can change the way people live and the society of the future assessing both the new opportunities and threats posed by uncontrolled technological progress Accordingly it will appeal to social scientists political scientists economists and historians who are interested in technological transformations and their social and economic impacts The Cybernetic Revolution and the Forthcoming Epoch of Self-Regulating Systems Grinin, Leonid, Grinin, Anton L., 2016-01-01 The monograph presents the ideas about the main changes that occurred in the development of technologies from the emergence

of Homo sapiens till present time and outlines the prospects of their development in the next 30 60 years and in some respect until the end of the twenty first century What determines the transition of a society from one level of development to another One of the most fundamental causes is the global technological transformations Among all major technological breakthroughs in history the most important are three production revolutions 1 the Agrarian Revolution 2 the Industrial Revolution and 3 the Cybernetic one The book introduces the theory of production revolutions which is a new valuable explanatory paradigm that analyzes causes and trends of dramatic shifts in historical process The authors describe the course of technological transformations in history and demonstrate a possible application of the theory to explain the present and forthcoming technological changes They analyze the technological shifts which took place in the second half of the twentieth and early twenty first centuries and forecast the main shifts in the next half a century On this basis the authors present a detailed analysis of the latest production revolution which is denoted as ybernetic They make some predictions about its development in the nearest five decades and up to the end of the twenty first century and show that the development of various self regulating systems will be the main trend of this revolution The authors argue that the transition to the starting final phase of the Cybernetic Revolution in the 2030 2040s will first occur in the field of medicine in some its innovative branches In future we will deal with the started convergence of innovative technologies which will form the system of MANBRIC technologies i e the technological paradigm based on medicine additive nano and bio technologies robotics IT and cognitive technologies The monograph gives an outline of the future breakthroughs in medicine and some other technologies between the 2010s and 2070s *The Cybernetic Revolution* John Rose,1974 **Globalistics and globalization studies** Leonid E. Grinin,Ilya V. Ilyin,Peter Herrmann,Andrey V. Korotayev, The scope of human thought along with its ability to proceed from reconstruction of the most ancient periods to anticipation of the distant future from small objects to galaxies and the Universe as well as to embrace different trends and dimensions of reality never ceases to amaze us You are reading a new issue of the Yearbook which contains some grains of the description of the billion years path This Yearbook presents the global studies which cover different fields of research The present volume is the sixth in the series of yearbooks with the title Globalistics and Globalization Studies The subtitle of the volume is Global Evolution Historical Globalistics and Globalization Studies which reflects the contents The present issue brings together a variety of contributions devoted to mega and global evolution Part I historical globalistics Part II globalization and glocalization Parts III IV Besides Part IV comprises some issues on the view in the future We become more and more accustomed to think globally and to see global processes The yearbook will be interesting to a wide range of researchers teachers students and all those who are concerned about global issues **Story of a Death Foretold** Oscar Guardiola-Rivera,2013-11-05 Presents an account of the short rise and fall of President Salvador Allende who died of gunshot wounds on September 11 1973 following the military coup that deposed him **Industry 4.0** Tessaleno Devezas,João Leitão,Askar Sarygulov,2017-02-28 This book presents the

latest research perspectives on how the Industry 4.0 paradigm is challenging the process of technological and structural change and how the diversification of the economy affects structural transformation. It also explores the impact of fast growing technologies on the transformation of socioeconomic and environmental systems and asks whether structural and technological change can generate sustainable economic growth and employment. Further, the book presents the basic innovations, new technologies, materials, energy, etc., and industrial policies that can lead to such a structural change.

Reconsidering the Limits to Growth Viktor Sadovnichy, Askar Akaev, Ilya Ilyin, Sergey Malkov, Leonid Grinin, Andrey Korotayev, 2023-09-25. Echoing the famous The Limits to Growth report from 1972, this edited volume analyses the changes that the World System has undergone to the present on the fiftieth anniversary of the original report. During the past fifty years, both the concept and understanding of these limits have significantly changed. This book highlights that the evolution of the World System has approached a new critical milestone, moving into a fundamentally new phase of historical development when the old economic and social technologies no longer work as efficiently as before or even begin to function counterproductively, which leads the World System into a systemic crisis. The book discusses the transition of human society to a new phase, the shape of which has not yet been determined. New approaches are needed for both the analysis of the global situation and for forecasts. The book is based on an integrated approach including the world systems' historical and evolutionary perspectives as well as a systematic view of society in which changes in one subsystem cause transformations in others. Through mathematical modeling, it defines the main vectors of transformations of the World System, makes a detailed forecast of the development of all the main subsystems of the society and the World System while presenting horizons of changes from short term to ultra long term and presents different development scenarios as well as recommendations on how to achieve a transition to the most favorable scenario. The book will appeal to members and followers of the Club of Rome, policy makers as well as to scholars from various disciplines interested in a better understanding of the World System evolution, global futures, development studies, climate change, and future societies.

The Future of Cities Andrew Blowers, Chris Hamnett, Philip Sarre, 2014-06-17. This collection of readings draws on material from a wide range of sources from the past and present and from literature and technology and is concentrated on the areas which seem most relevant to the planning of the future city: what is happening to the city and what we can do about it. The readings have been selected and organised to present the planning of the future city. This book was first published in 1974.
