, *The Service-Dominant Logic of Marketing* Robert F. Lusch, Stephen L. Vargo, 2014-12-18 Expanding on the editors award winning article *Evolving to a New Dominant Logic for Marketing* this book presents a challenging new paradigm for the marketing discipline This new paradigm is service oriented customer oriented relationship focused and knowledge based and places marketing once viewed as a support function central to overall business strategy Service dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision rather than the exchange of goods as the proper subject of marketing It moves the orientation of marketing from a market to philosophy where customers are promoted to targeted and captured to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process The editors elaborate on this model through an historical analysis clarification and extension of service dominant logic and distinguished marketing thinkers then provide further insight and commentary The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice **Management Information Systems** Anurag Malik, 2005 *EBOOK: Contemporary Management -*

Khurana, Asit B. Acharya, 2022-08-12

Covid 19 outbreak has been the biggest health social and economic emergency the world has ever faced since the Second World War. The pandemic has drastically changed at least temporarily the way society, businesses and infrastructure systems operate. It has forced us to take a closer look at our woefully inadequate health infrastructure. It also led to the closure of educational institutions and turned formal learning into distance learning, posing a daunting challenge of demand for e-learning infrastructure. Social distancing policies, SDPs encouraging people to stay home and limit gatherings impacted a wide range of services and industries. The telecommunications infrastructure in particular became a spotlight in view of its critical importance to keep businesses, governments and societies connected and running in the period of economic and social disruption. The governments acknowledged a fact that telecommunications, internet services, broadcasting, cable services, IT and IT-enabled services (ITeS) are the essential services. Work from Home (WFH) seemed a positive experience, however, with some adverse impact on the social behavioural and physical factors. ICEIM 2022 is a humble contribution of SPM PDEU in terms of presenting a scholarly platform wherein abundance of ideas answers right questions and complementing new learnings are expected to emerge. The conference aims at discussing and deliberating various contemporary issues and challenges in the management of energy infrastructure. The conference showcases seven tracks, five of which are Business, Technology, Finance, Human Resource, Marketing and Project Operations Management. Then, in view of emerging scenarios, two more tracks were added, namely Business Analytics and Data Science Strategies, Entrepreneurship Management. We do expect to receive 80-90 research papers covering various tracks of the conference. We have so far got regular research papers, industry papers, Ph.D. research papers and students' research articles. New research directions also constitute an agenda of a conference. This conference had three plenary sessions: a) Emerging Electrical Vehicle Ecosystem: Prospects and Impediments; b) Infrastructure Development in India: Policy Perspectives and Innovative Financing Initiatives; c) Energy Sector Management Challenges and Strategies in Industry 4.0 era. All the plenary sessions of this conference have speakers mostly from the industry. We strongly believe that this International Conference will provide ample opportunities to all participants to disseminate new research ideas with industry professionals as well as the policy makers. It is also believed that this International Conference will initiate a new thought process towards the issues and challenges faced by the energy and infrastructure and will definitely add substantially to the existing domain of knowledge. We are pleased to present this proceeding of the International Conference to the academicians, researchers, industry practitioners and policy makers who all have joined hands towards building the new knowledge development in the area of energy infrastructure management.
