CPSM Exams Self-Practice Review Questions for Certified Professional in Supply Management Examreview,2015-12-07 According to the ISM CPSM is the credential that surpasses the demands of the international marketplace with multi faceted skills in areas such as finance supplier relationship management organizational global strategy and risk compliance The CPSM qualification enables professionals to gain a clear understanding of their organization s supply operation and enable managers to take an active role in critical decisions It is slightly different from APICS s CSCP in that it is targeting those who wish to have a broad understanding of all components of the profession It focuses primarily on strategic supply management less on fundamental or tactical level knowledge CSCP places heavier focus on integrated supply chain while CPSM does not The certification track requires 3 exam modules with topics that are inter related We suggest that you go through ALL TOPICS AND MODULES before taking any of the individual exam parts Do NOT study on a per module basis Instead treat all

of them as a whole this will guarantee that you don't get tripped up when closely related questions show up on different exam parts. This is why we do not break down the practice questions into modules; we force you to assess your readiness to everything covered in the entire certification track. We create these self-practice test questions referencing the concepts and principles currently valid in all these exams. Each question comes with an answer and a short explanation which aids you in seeking further study information. For purpose of exam readiness drilling, this product includes questions that have varying numbers of choices. Some have 2 while some have 5 or 6. We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. Think of these as challenges presented to you so to assess your comprehension of the subject matters. The goal is to reinforce learning to validate successful transference of knowledge and to identify areas of weakness that require remediation. The questions are NOT designed to simulate actual exam questions. Realistic or actual questions that are for cheating purpose are not available in any of our products. **Certified Supply**

A supply chain is a network of retailers, distributors, transporters, storage facilities, and suppliers that participate in the sale, delivery, and production of a particular product. The concept of supply chain often involves backward integration, acquiring ownership of one's supply chain in the hope of reducing supplier power and thus reducing input costs. The four major functional components are demand planning, manufacturing planning and scheduling, supply planning, and transportation planning. The Certified Supply Chain Professional CSCP certification is essential for professionals involved in the areas of supplier and customer relations, international trade, the use of information technology to enable the supply chain, and physical logistics. Candidates must pass a 4-hour exam in order to earn the CSCP designation. The major topics covered included Supply Chain Management Fundamentals, Building Competitive Operations, Planning and Logistics, Managing Customer and Supplier Relationships, Using Information Technology to Enable Supply Chain Management. Officially, CPIM focuses primarily on manufacturing and provides an in-depth view of materials management, master scheduling, production planning, forecasting, and quality improvement within an organization, while CSCP takes a broader view to encompass all steps throughout the supply chain. In reality, the CSCP exam and the CPIM BSCM exam share a lot of common topics on SCM. This ExamFOCUS Study Notes build a solid focus while revisiting key examination topics relevant to the CSCP exam and also to the first CPIM module BSCM.

Whether you are just starting to study cramming at the last minute or simply looking to refresh this could prove to be a lifesaver To succeed in the CSCP exam you need to get yourself truly familiar with the most important information by going through sufficiently focused revision This is where we fill the gap you may think of our product as the unofficial supplement to the regular training class or you may view it as a standalone module with a focus on building up your exam readiness As an effective learning aid implemented in the format of study notes the ExamFOCUS Study Notes package is designed to present information in an easy to understand conversational format Notes are well written technically accurate and completely representative of the key information covered by the exam
