Operating Manual Celestron International, 1978 *Beginning Astronomy with a Celestron ... So, What's the Matter?* Jim Meadows, 2012-04-24 I am an engineer and like to solve problems I also like Astronomy Like I say in my second book this is not a book about Astronomy though There are many good books about beginning Astronomy and learning the night sky This book is about common problems you may run into when starting Astronomy with a new telescope It specifically addresses some items you may run into when setting up and using a Celestron NexStar 8se telescope which is a great telescope for

pursuing Astronomy Some items covered for the Celestron NexStar 8se telescope also apply to other Celestron telescope models This is not intended to be a replacement for your manual Be sure to follow the manual as much as possible This book contains helpful information that is not detailed in the manual that will hopefully save you some time and frustration The format of this book is simple It contains a list of questions with a discussion of how to resolve the problem at hand Care of Astronomical Telescopes and Accessories M. Barlow Pepin, 2009-10-12 Commercially made astronomical telescopes are better and less expensive than ever before and their optical and mechanical performance can be superb When a good quality telescope fails to perform as well as it might the reason is quite probably that it needs a little care and attention Here is a complete guide for anyone who wants to understand more than just the basics of astronomical telescopes and accessories and how to maintain them in the peak of condition The latest on safely adjusting cleaning and maintaining your equipment is combined with thoroughly updated methods from the old masters Here too are details of choosing new and used optics and accessories along with enhancements you can make to extend their versatility and useful lifetime This book is for you Really Looking after an astronomical telescope isn't only for the experts although there are some things that only an expert should attempt and every serious amateur astronomer will find invaluable information here gleaned from Barlow Pepin's many years experience working with optical instruments **Star Testing Astronomical Telescopes** Harold Richard Suiter, 1994-01
