Critical Thinking And Language The Challenge Of Generic Skills And Disciplinary Discourses:

Critical Thinking and Language Tim John Moore, 2011-12-15 **Critical Thinking and Language** Tim John

Moore, 2011-10-13 This book clarifies the idea of critical thinking by investigating the critical practices of academics across a range of disciplines Drawing on key theorists Wittgenstein Geertz Williams Halliday and using a textographic approach the book explores how the concept of critical thinking is understood by academics and also how it is constructed discursively in the texts and practices they employ in their teaching Critical thinking is one of the most widely discussed concepts in debates on university learning For many the idea of teaching students to be critical thinkers characterizes more than anything else the overriding purpose of higher education But whilst there is general agreement about its importance as an educational ideal there is surprisingly little agreement about what the concept means exactly Also at issue is how and what students need to be taught in order to be properly critical in their field This searching monograph seeks answers to these important questions

Critical Thinking Gregory Hadley, Andrew Boon, 2022-10-31 Critical Thinking provides language teachers with a dynamic framework for encouraging critical thinking skills in explicit systematic ways during their lessons With the proliferation of fallacious arguments fake news and untrustworthy sources in today's multimedia landscape critical thinking skills are vital not only in one's native language but also when engaged in the task of language learning Written with the language teacher in mind this book provides a springboard for teaching critical thinking skills in multicultural multilingual classrooms Suitable for graduate students in training teachers and language curriculum developers interested in purposeful applications of critical thinking pedagogy for the second language classroom this volume presents classroom activities suggestions for lesson planning and ideas for researching the impact of critical thinking activities with second language learners This book is ideal as an invaluable resource for teacher directed classroom investigations as well as graduate dissertation projects ELTons 2024 Finalist Innovation in Teacher Resources A detailed description of the book can be accessed through this 30 second video https://1drv.ms/v/s/AhpTlkQv9ubFgYAkZw_UYt6qg3mItw_eDmqXaR

Development of Innovative Pedagogical Practices for a Modern Learning Experience Dr. Dennis Koyama, 2021-12-20 In the current volume the selected studies have been grouped into three thematic sections presenting readers with a set of distinct but related research on meaningful issues for a modern learning experience The first three chapters present professional and teacher development perspectives and collectively shed light on how to develop maintain and improve pre and in service teacher training and professional development The second set of four chapters provide research findings that describe the results of direct applications of modern learning elements through course assignments and teaching approaches The final five chapters focus on critical thinking and range in their focus from classroom based studies to full scale curriculum reform The collection of chapters presented in this volume represents the eclectic nature of modern learning experiences and demonstrate its applicability across educational contexts and disciplines The chapters resonate with other educational researchers in search of novel ways of creating facilitating and investigating modern learning experiences

Rethinking EMI Lily I-Wen Su, Hintat Cheung, Jessica R. W. Wu, 2021-06-10 Due to the competitive edge it confers on students educational institutions and non English speaking nations in a globalized economy English as a medium of instruction EMI has been gaining popularity in tertiary education in non native English speaking NNEST countries Institute wide EMI implementation has often been imposed by top down decisions in combination with the optimistic view that the horse should always be placed before the cart However emerging evidence suggests that the delivery of such programs to NNEST students has led to new pedagogical challenges and learning problems that go beyond the scope of language learning and teaching and deserve immediate attention For example how would an instructor respond to situations in which students learning of content is compromised by their limited language proficiency This book draws on the current practice of EMI in diverse disciplines and university settings and examines how these new pedagogical and learning issues can be addressed The discussion also involves a reflection on the essence of EMI in relation to the use of the first language L1 as the medium of instruction in tertiary education In addition the book includes discussion about how to ensure and maintain the quality of EMI programs and assess the readiness of stakeholders for such programs which include administrators teachers and students The discussion is led by exemplars in Hong Kong and Taiwan where the majority of students are native Chinese speakers in the hope of developing critical perspectives and practical guidelines as references for EMI in other NNEST settings The Open Access version of this book available at <http://www.taylorfrancis.com/books/e> ISBN

has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **Critical Thinking in Academic Writing** Shi PU, 2021-08-30 The book inquires into critical thinking through a cultural approach Based on an ethnographic study it compares Chinese postgraduate students' conceptualisations and applications of critical thinking in three different settings in China and the UK From an insider's perspective it analyses the intricate interplay of multiple cultural and individual factors that condition students' critical thinking development as they learn to write an academic thesis and to manage postgraduate learning The book offers insights into the nature of problems that Chinese students encounter with critical thinking and envisions possibilities for the ideas for critical thinking to have a transformative power in an intercultural space The book will primarily be of interest to academics and educators who work on critical thinking and academic writing especially those who work with Chinese students Scholars interested in intercultural issues in higher education may also find it relevant
