Stingl's claims not the engine of freedom and democracy that they once were hailed to be this much is already clear in the wake of the snooping and surveillance crises that broke in recent years Digitalization is but another version of the coloniality of power and being that has been at work for decades and centuries He poses the question whether Digital Age possess the legitimacy that digitalization has claimed His response is critically realistic but he doesn't stop at a critique for criticism's sake Inspired by the ideas of decolonial scholars feminist science studies current biological and neuro cognitive research and sociologists capable of reflection and self criticism Stingl attempts to break the canvas of sociology and show that adding a third and decolonial dimension to the two dimensional sociological imagination is indeed possible He illustrates that it is possible that classrooms free speech on internet and the inequalities in the production and distribution of a new form of social capital digital cultural health care capital can be subjected to a decolonial perspective along a sociological line of inquiry if sociologists allow for relations with other disciplines and scholarship to be integrative conversations The goal of this book is not to offer results or closed arguments but to create instead platforms for thinking further opening new lines of inquiry and to argue that it is not enough to identify problems or to attempt solve the problems with politics or best practice solutions Instead he proposes we must learn to identify and make use of the opportunities that are produced by any problem Stingl's conclusion is in short that a sociology that takes the decolonial challenge and critique seriously can not be a sociological sub discipline or a sociology of a problem but it must be a sociology of opportunities
