Kant's ›Critique of Aesthetic Judgment‹ in the 20th Century Stefano Marino, Pietro Terzi, 2020-11-09 Kant's Critique of Judgment represents one of the most important texts in modern philosophy. However, while its importance for 19th century philosophy has been widely acknowledged, scholars have often overlooked its far-reaching influence on 20th century thought. This book aims to account for the various interpretations of Kant's notion of aesthetic judgment formulated in the last century. The book approaches the subject matter from both a historical and a theoretical point of view and in relation to different cultural contexts, also exploring in an unprecedented way its influence on some very up-to-date philosophical developments and trends. It represents the first choral and comprehensive study on this missing piece in the history of modern and contemporary philosophy, capable of cutting in a unique way across different traditions, movements, and geographical areas. All main themes of Kant's aesthetics are investigated in this book, while at the same time showing how they have been interpreted in very different ways in the 20th century. With contributions by Alessandro Bertinetto, Patrice Canivez, Dario Cecchi, Diarmuid Costello, Nicola Emery, Serena Feloj, Gnter Figal, Tom Huhn, Hans Peter Krger, Thomas W. Leddy, Stefano Marino, Claudio Paolucci, Anne Sauvagnargues, Dennis J. Schmidt, Arno Schubbach, Scott R. Stroud, Thomas Teufel, and Pietro Terzi.

Kant and the Capacity to Judge Béatrice Longuenesse, 2020-06-16 Kant claims to have established his table of categories or pure concepts of the understanding according to the guiding thread provided by logical forms of judgment. By drawing extensively on Kant's logical writings, Béatrice Longuenesse analyzes this controversial claim and then follows the thread through its continuation in the transcendental deduction of the categories, the transcendental schemata, and the principles of pure understanding. The result is a systematic, persuasive new interpretation of the Critique of Pure Reason. Longuenesse shows that although Kant adopts his inventory of the forms of judgment from logic textbooks of his time, he is nevertheless original in selecting just those forms he holds to be indispensable to our ability to relate representations to objects. Kant gives formal representation to this relation between conceptual thought and its objects by introducing the term *x* into his analysis of logical forms to stand for the object that is thought under the concepts that are combined in judgment. This *x* plays no role in Kant's forms of logical inference but instead plays a role in clarifying the relation between logical forms, forms of concept subordination, and combinations/syntheses of perceptual data necessary for empirical cognition. Considering Kant's logical forms of judgment thus helps illuminate crucial aspects of the Transcendental Analytic as a whole, while revealing the systematic unity between Kant's theory of judgment in the first Critique and his analysis of merely reflective aesthetic and teleological judgments in the third Critique.

Medusa's Ear Dawne McCance, 2012-02-01 In traditional mythology and iconography Medusa's killing powers are attributed to visual means the monster is slain for her looks and her effect is to kill men for looking at her Challenging the familiar account of the modern era as ocularcentric this book reads the Medusa effect on the philosophy of the modern research university as rooted in an audiocentric fantasy Author Dawne McCance links phonocentrism to an aural imaginary by tracking the trope and terror of the deaf ear and mute mouth in the discourse on the university that was inaugurated by

Kant and that extends through Hegel and Heidegger to the present She shows how repeatedly in founding texts on the modern research university the philosopher's fearful recoil from an animal female figure that he defines as deaf and dumb has the effect the Medusa effect of cutting off his own and therefore the institution's ear and tongue McCance also considers some recent efforts to shake the modern institution out of its Medusa effect petrification

Kant's Model of the Mind Wayne Waxman, 1991 This book argues that Kant's transcendental idealism has been misinterpreted it denies not simply the super sensory reality of space time and appearances but their reality outside imagination as well After adducing extensive and explicit textual evidence in its favor Waxman shows this interpretation to be essential to the Transcendental Deduction the affirmation of things in themselves and the attempt to surmount Hume's scepticism He further argues that Kant's much neglected claim that besides himself no psychologist has so much as even thought that the imagination might be a necessary constituent of perception should be construed so that even our consciousness of sensation itself visual tactile etc is impossible without imagination A compelling and original contribution to Kantian scholarship Kant's Model of the Mind will also bear close examination by students and scholars of Hume the philosophy of mind and the philosophy of science
