Beyond Interdisciplinarity Julie Thompson Klein, 2021 Beyond Interdisciplinarity examines the broadening meaning of core concept across academic disciplines and other forms of knowledge In this book Associate Editor of The Oxford Handbook of Interdisciplinarity and internationally recognized scholar

Julie Thompson Klein depicts the heterogeneity and boundary work of inter and trans disciplinarity in a conceptual framework based on an ecology of spatializing practices in transaction spaces including trading zones and communities of practice. The book includes both crossdisciplinary work encompassing multi inter and trans disciplinary forms as well as cross sector work spanning disciplines, fields, professions, government and industry and communities. The first section of the book defines and explains boundary work, discourses of interdisciplinarity and the nature of interdisciplinary fields. In the second section, Klein examines dynamics of working across disciplines, including communication, collaboration and learning with concrete examples and lessons from research projects and programs that transcend traditional fields. The closing chapter examines reasons for failure and success, then presents gateways to literature and other resources. Throughout the book, Klein emphasizes the roles of contextualization and historical change while factoring in the shifting relationship of disciplinarity and interdisciplinarity, ascendancy of transdisciplinarity and intersections with other constructs including Mode 2 knowledge production, convergence, team science and postdisciplinarity. The conceptual framework she provides also includes the role of boundary objects, agents and organizations in brokering differences and creating platforms for change. Klein further explains why translation, interlanguage and a communication boundary space are vital to achieving intersubjectivity and collective identity. They foster not only pragmatics of negotiation and integration but also reflexivity, transactivity and co-production of knowledge with stakeholders beyond the academy. Rhetorics of holism and synthesis compete with instrumentalities of problem solving and transgressive critiques. However, typical warrants today include complexity, contextualization, collaboration and socially robust knowledge. Crossing boundaries remains complex, but this book guides readers through the density of pertinent literature while expanding understandings of crossdisciplinary and cross sector work.

Tackling Wicked Problems John Harris, Valerie A Brown, Jacqueline Russell, 2010-09-23. From climate change to GM foods, we are increasingly confronted with complex interconnected social and environmental problems that span disciplines, knowledge bases and value systems. This book offers a transdisciplinary open approach for those working towards resolving these wicked problems and highlights the crucial role of this transdisciplinary imagination in addressing the shift to sustainable futures. *Tackling Wicked Problems* provides readers with a framework and practical examples that will guide the design and conduct of their own open ended enquiries. In this approach, academic disciplines are combined with personal, local and strategic understanding and researchers are required to recognise multiple knowledge cultures, accept the inevitability of uncertainty and clarify their own and others ethical positions. The authors then comment on fifteen practical examples of how researchers have engaged with the opportunities and challenges of conducting transdisciplinary inquiries. The book gives those who are grappling with complex problems innovative methods of inquiry that will allow them to work collaboratively towards long term solutions.

scholarship Composition Rhetoric and Disciplinarity asks a fundamental question can Composition and Rhetoric as a discipline continue its historical commitment to pedagogy without sacrificing equal attention to other areas such as research and theory In response contributors to the volume address disagreements about what it means to be called a discipline rather than a profession or a field elucidate tensions over the defined breadth of Composition and Rhetoric and consider the roles of research and responsibility as Composition and Rhetoric shifts from field to discipline Outlining a field with a complex and unusual formation story Composition Rhetoric and Disciplinarity employs several lenses for understanding disciplinarity theory history labor and pedagogy and for teasing out the implications of disciplinarity for students faculty institutions and Composition and Rhetoric itself Collectively the chapters speak to the intellectual and embodied history leading to this point to questions about how disciplinarity is and might be understood especially with regard to Composition and Rhetoric to the curricular conceptual labor and other sites of tension inherent in thinking about Composition and Rhetoric as a discipline and to the implications of Composition and Rhetoric s disciplinarity for the future Contributors Linda Adler Kassner Elizabeth H Boquet Christiane Donahue Whitney Douglas Doug Downs Heidi Estrem Kristine Hansen Doug Hesse Sandra Jamieson Neal Lerner Jennifer Helene Maher Barry Maid Jaime Armin Mej a Carolyn R Miller Kelly Myers Gwendolynne Reid Liane Robertson Rochelle Rodrigo Dawn Shepherd Kara Taczak
