

- Be sure to keep all user documentation handy for future reference.
- Your watch may differ somewhat from the one shown in the illustration.

- Do not try to perform stopwatch operations while the crown is pulled out either to the first or second click. If you try to press a button, you might accidentally cause the crown to pop out.

2. Press to stop the stopwatch.
 • You can resume the measurement operation by pressing again.

Supporting time synchronization between watches

Use of the watch can cause the starting positions of the stopwatch minute hand and second hand to become skewed. Upon following procedure to check hand alignment and to adjust the positions of the hands so they point to 12 o'clock when the stopwatch is reset.

10. **To adjust the positions of the stopwatch hands**
Press **STOP** to reset the stopwatch, and check the alignment of the stopwatch minute hand to the second hand.
Pull out the crown to the second click.
Turn the crown clockwise to move the second hand forward until it points to 12 o'clock.
If the stopwatch minute hand is aligned correctly, proceed to step 5. If the alignment is not correct, turn the crown clockwise until the second hand points to 12 o'clock, so the stopwatch minute hand jumps to 0.
Push the crown back in to its normal position. Now that pulling the crown out also stops the Smokecruiser second hand. After the second hand has stopped, turn the crown clockwise to align the second hand to 12 o'clock.

For a watch with an elapsed time bezel:
Rotate the elapsed time bezel to align the mark with the minute hand.
After certain amount of time elapsed, read the graduation on the elapsed time bezel which the minute hand points to.
The elapsed time is indicated.

- Some water resistant models are equipped with a screw lock crown.
- With such models, you must unscrew the crown in the direction noted in the illustration to loosen it before you can remove the crown. Do not use a screwdriver.
- Also note that such watches are not water resistant while the crowns are removed. Be sure to screw the crowns back in. They will do no harm if removed any longer.

Accuracy at normal temperature: ± 20 seconds a month
Display: 3 analog hands (Sleeping, 20 and minutes, stopwatch seconds, and minutes, day)
Stopwatch function: Measuring capacity: 99,999.9 Measuring unit: 1 second
Battery: One silver oxide battery (Type: SR920) with one stopwatch operation 60 min./day

Water Resistance
 The following applies to watches with WATER RESIST or WATER RESISTANT marked on the back cover.

Marking	Example of Daily Use	Water Resistance Under Dry Use	Enhanced Water Resistance Under Daily Use		
		No Soap/Mark	Atmospheres		
			100ATM	100ATM	200ATM
	On watch front or on back cover	No	Yes	Yes	Yes
	Washing, swimming, rain	Yes	Yes	Yes	Yes
	Waterproof mark, swimming	No	Yes	Yes	Yes
	Windsurfing	No	Yes	Yes	Yes

- Do not use this watch for scuba diving or other types of diving that require air tanks. Watches that do not have **WATER RESIST** or **WATER RESISTANT** marked on the back cover are not designed to be worn while swimming. The watch is designed for use in dry conditions where it will be exposed to large amounts of sweat or moisture, or to direct exposure to water. If the watch is water resistant, do not operate its buttons or crown while it is submerged in water. Do not use the watch in hot water or in environments with high humidity. Avoid use in salt water, swimming pools, or near swimming pools. Avoid use in saunas, hot tubs, steam baths, or near steam baths. Avoid use in environments (hot air, shampoo, etc.) that are being used. Such conditions can reduce water resistance. After submersion in seawater, use plain water to rinse all salt and dirt from the watch. After use in salt water, use fresh water to rinse the watch. Do not use harsh chemicals or abrasives. Without once every two to three years, check your watch for proper water resistance whenever you have its battery replaced. Battery replacement requires the use of special tools and procedures. Contact the authorized service center for more information. Do not use the authorized CASIO Service Center. Do not use the watch with a leather strap or leather bands. Avoid swimming. The strap or band of the watch is made of a material that is exposed to a sudden change in temperature. This may cause the strap or band to become brittle and break. If the strap or band is not clean or if water has gotten into the watch, take the watch in for service. Improper use of the watch, such as wear inside can result in damage to electronic and mechanical parts.

- _____

Temperature
Do not leave the watch on the dashboard of a car, near a heater, or in any other location that is subject to very high temperatures. Do not leave the watch where it will be exposed to very low temperatures, either. Temperature extremes can cause the watch to lose or gain time.

Impact Your watch is designed to withstand impact incurred during normal daily use and light abuse. Severe impact, such as playing catch, tennis, etc., or dropping the watch or striking it, subjecting it to strong impact, however, can lead to malfunction. The watch is not designed to be used as a sledgehammer. Baby-G, G-mix can be worn while operating a chain saw or engaging in other activities that generate strong vibration.

- The hands of analog and combination (analog-digital) watches are moved by a motor that uses magnetic force. When such a watch is close to a device (audio speakers, magnetic necklaces, cell phone, etc.) that emits strong magnetism, the magnetism can cause the needles to slow down or stop, or even to jump, making the time incorrect.

Electrostatic Charge
 - Exposure to very strong electrostatic charge can cause the watch to display the wrong time.
 - Very strong electrostatic charge even can damage electronic components.

Chemicals

Do not allow the resin to come into contact with thinner, gasoline, solvents, oils, or fats, or with any cleaners, adhesives, paints, medicines, or cosmetics that contain such ingredients. Doing so can cause discoloration or damage to the case, resin band, leather band, and other parts.

[illegible]

- Allowing this watch to remain in contact with other items or storing it together with other items, especially leather goods, may cause the leather band to become discolored or damaged. To prevent this, store the watch in a separate pouch or container.
- The natural leather or imitation leather band of the watch. Be sure to dry off the watch thoroughly before storing it and make sure it is not in contact with other items.
- The leather band should not be worn for long periods of time. Wearing the watch for long periods or failure to clean dirt from a leather band for long periods can cause it to become discolored or damaged.

- Subjecting a natural leather or imitation leather band to rubbing or dirt can cause color transfer and discoloration.

• To clean, absorb or dry a wet surface, use a wet-dry vacuum. This is a special vacuum that can be used to pick up liquids and solids. It is also used to clean up spills and leaks. It is a good idea to have one in your home or office.

* The bacteria and odor resistant band protects against odor generated by the formation of maximum bacteria and odor resistance, keep the band clean. Use an absorbent soft cloth to wipe the band clean of dirt, sweat, and moisture. The bacteria and odor resistant band is responsible for the protection of organisms and bacteria. It does not protect against rash due to allergic reaction, etc.

Note that CASIO COMPUTER CO., LTD. assumes no responsibility for any damage or loss suffered by you or any third party arising through the use of this product or its malfunction.

Caring for Your Watch

- A dirty or rusty case or band can soil the sleeve of your clothing, cause skin irritation, and even stain your skin. Wash your watch case and band in warm soapy water. Rinse thoroughly and dry. Fasten the band to form easily after the watch is exposed to saltwater and then left in the sun.
- Some watches have a smudge-like pattern that appears on the surface of a resin band. This will disappear if you rub the pattern with a soft cloth.
- Keep a leather band clean by wiping it with a dry cloth. Both resin bands and leather bands can become worn and cracked over time when subjected to harsh daily use.
- Do not use harsh chemicals or abrasives to clean your watch. If you need to replace a new strap, request full replacement from your original retailer or an authorized CASIO retailer.
- Your watch is still covered by its warranty.
- Remember to take good care of your skin. You need to keep your skin clean, just like a piece of clothing. Because of this, you should always keep your watch clean. Use a soft, absorbent cloth to clean your watch.

- Though the stainless steel used for the watch is highly rust-resistant, rust can form if the watch is not cleaned after it becomes dirty. Failure of oxygen to come into contact with the metal because it is dirty causes breakdown of the oxidation layer on the metal.

- Leaving sweat or water on a resin band or storing it in an area subject to high moisture can lead to premature wear, cuts, and breaks.

[illegible]

- Have the battery replaced only with the type specified by in this manual. Use of another type of battery can cause malfunction.
- When replacing the battery, also request a check for proper water resistance. Note that

- **This Battery:** The battery that comes loaded in your watch when you purchase it is used for function and performance testing at the factory.

- Low battery power is indicated by large time-keeping error, when display contents are dim, or when the display does blank.
- Operation while battery power is low can result in malfunction. Replace the battery as soon as possible.

Impact Your watch is designed to withstand impact incurred during normal daily use and light abuse. Severe impact, such as playing catch, tennis, etc., or dropping the watch or striking it with a strong impact, however, can lead to malfunction. The watch is not designed to be used as a sledgehammer. Baby-G, G-mat can be worn while operating a chain saw or engaging in other activities that generate strong vibration.

- The hands of analog and combination (analog-digital) watches are moved by a motor that uses magnetic force. When such a watch is close to a device (audio speakers, magnetic necklaces, cell phone, etc.) that emits strong magnetism, the magnetism causes the watch to slow down or stop, or even to run up or stop, making it unusable for the time being.

Electrostatic Charge
 - Exposure to very strong electrostatic charge can cause the watch to display the wrong time.
 - Very strong electrostatic charge even can damage electronic components.

Chemicals

Do not allow the resin to come into contact with thinner, gasoline, solvents, oils, or fats, or with any cleaners, adhesives, paints, medicines, or cosmetics that contain such ingredients. Doing so can cause discoloration or damage to the case, resin band, leather band, and other parts.
