Dictionary of Critical Realism Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the

literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism

theorists alike **Critical Realism and Housing Research** Julie Lawson, 2013-01-11 Since the nineteenth century various housing solutions have evolved such as sprawling Australian home ownership and compact Dutch social rental housing This phenomenon cannot be adequately explained with simple descriptions of key events politics and housing outcomes Critical Realism and Housing Studies pushes debate forward arguing that a new ontological perspective is required to address fundamental issues in housing and comparative research This book is clearly organized into three parts which evaluate ontological and methodological alternatives for comparative housing research provide two historical case studies inspired by critical realist ontology compare the causal tendencies that explain diverging housing pathways in Australia and the Netherlands Lawson proposes that we turn to critical realism for the solution From this perspective the causal tendencies of complex open and structured housing phenomena are highlighted With this insight we are able to extract the key social arrangements which promote different housing solutions from the historical case studies Social arrangements which are found to influence alternative pathways in housing history concern the property rights circuit of savings and investment as well as labour and welfare relations As they develop differently over time and space they affect where when and how housing solutions develop
