Critical Animal Geographies Kathryn Gillespie, Rosemary-Claire Collard, 2015-01-30 *Critical Animal Geographies* provides new geographical perspectives on critical animal studies exploring the spatial political and ethical dimensions of animals lived experience and human animal encounter It works toward a more radical politics and theory directed at the shifting boundary between human and animal Chapters draw together feminist political economic post humanist anarchist post colonial and critical race literatures with original case studies in order to see how efforts by some humans to control and order life human and not violate constrain and impinge upon others Central to all chapters is a commitment to grappling with the stakes violence death life autonomy of human animal encounters Equally the work in the collection addresses head on the dominant forces shaping and dependent on these encounters capitalism racism colonialism and so on In doing so the book pushes readers to confront how human animal relations are mixed up with overlapping axes of power and exploitation including gender race class and species

Animals and the Environment Lisa Kemmerer, 2015-05-01 *Contemporary Earth* and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals

Zoos and Tourism Warwick Frost, 2011 Zoos are important and popular tourist attractions Spread around the world they are typically located in major cities with visitation levels comparable to other major attractions Nature based attractions constructed in artificial settings they face the challenge of trying to balance potentially conflicting aims of conservation education and entertainment The best are continually developing fresh and effective techniques on visitor interpretation and management the worst highlight the manipulation of animals for human gratification Taking a global approach this book examines the problems and paradoxes of zoos as they try to balance their roles as visitor attractions while repositioning themselves as leading conservation agencies This book provides a detailed and critical examination of the conflicting roles and identities of the modern zoo from a tourism perspective and as such reminds us that zoos are as much about the people who visit them as about the animals that they display At a time when they are under continual critical scrutiny this book delivers a fresh approach to our understanding and appreciation of zoos and of the challenges and opportunities that they face as they strive to remain relevant within

modern society Andrew Tribe University of Queensland Australia **Sacred, Symbolic, and Contested** Gregory S. Szarycz, 2025-09-04 Sacred Symbolic and Contested explores how animals are revered represented and disputed across global cultures Through vivid case studies from sacred cows in India to ritual slaughter in Judaism and animal commodification in industrial societies this book reveals how human animal relationships express deep ethical religious and political tensions You ll encounter surprising contradictions animals celebrated in myth yet mistreated in practice or protected in law yet consumed in daily life Drawing on sociology religious studies and critical animal studies this timely work invites you to rethink the role of animals in shaping human identity culture and moral responsibility **Animals and Tourism** Kevin Markwell, 2015-05-01 This book critically examines the many ways in which tourism and animals intersect whether as tourist attractions wildlife conservation tools as travel companions or as meat to be eaten It aims to make a meaningful contribution to the growing body of knowledge concerning the relationships between animals tourists and the tourism industry The chapters are organised into three themes ethics and welfare conflict contradiction and contestation and shifting relationships Theoretically informed and empirically rich the chapters examine topics such as whale watching animal performances the objectification and commodification of animals and stakeholder conflict among a range of others It is hoped that the book will help to highlight key research questions and stimulate other researchers and students to reflect critically on the place of animals within tourism spaces experiences practices and structures Crocodile Dan Wylie, 2013-07-15 Tick tock tick tock Thanks to Peter Pan this sound if heard near water means run a hungry crocodile is on its way J M Barrie isn t fully to blame for spreading the word that crocodiles are our enemies or at least the enemies of one handed pirates innumerable songs stories and legends have characterized these reptiles as a symbol of pitiless predation and insatiable appetite Tracking twenty three crocodilian species from India and Egypt to Africa Australia and beyond Crocodile advocates that we do a complete one eighty in our views of these magnificent creatures Dan Wylie traces the crocodile in myth art and literature demonstrating that though we commonly associate the reptiles with ferocity and deceit they have also often been respected and revered in human history Discussing how crocodiles were all but wiped out in the middle of the twentieth century by hunters and skin traders and are now making a comeback he reveals that as apex predators they are today an increasingly important indicator of the health of an ecosystem and may outlive humans like they did dinosaurs Presenting a concise cogent case for why we should respect these fearsome animals this beautifully illustrated volume is a tribute to one of the world s ultimate survivors *Brute Force* Dominic Lennard, 2019-11-01 Considers how dangerous beasts in horror films illuminate the human animal relationship It s always been a wild world with humans telling stories of killer animals as soon as they could tell stories at all Movies are an especially popular vehicle for our fascination with fierce creatures In Brute Force Dominic Lennard takes a close look at a range of cinematic animal attackers including killer gorillas sharks snakes bears wolves spiders and even a few dinosaurs Lennard argues that animal horror is not so much a focused genre as it is an

impulse tapping into age old fears of becoming prey At the same time these films expose conflicts and uncertainties in our current relationship with animals Movies considered include King Kong Jaws The Grey Them Arachnophobia Jurassic Park Snakes on a Plane An American Werewolf in London and many more Drawing on insights from film studies art history cognitive science and evolutionary psychology Brute Force is an engaging critical exploration and appreciation of cinema s many bad beasts The brilliance of Dominic Lennard s Brute Force is not only that it is long overdue but one didn t realize it was due in the first place Yet upon reflection and of course through Lennard s engaging book one realizes not only the ubiquity of animals in horror but their utter centrality to so many classic horror films In reading this we can hear the distant rumble of footsteps of a genetically reborn Tyrannosaurus or the hurried pounding of our beloved Rover who has decided that he wants more than kibbles and bits for dinner and we look mighty appetizing Groundbreaking is often overused but in this case it truly fits David Desser coeditor of Tough Ain t Enough New Perspectives on the Films of Clint Eastwood **Cave Canem** Iain Ferris,2018-02-15 Lavishly illustrated this book examines both written and archaeological sources particularly visual evidence in the form of sculptures coins mosaics wall paintings and decorated everyday items in order to shed light on animals in Roman culture *Mathematikos gamtos fakulteto darbai ...* Lietuvos universitetas (Kaunas, Lithuania).

Matematikos gamtos fakultetas,1928 **Conservation, Biodiversity and International Law** A.
