Cross Disciplinary Perspectives On Lexical Blending Trends In Linguistics:

Cross-Disciplinary Perspectives on Lexical Blending Vincent Renner, François Maniez, Pierre Arnaud, 2012-12-19 The volume brings together a well selected collection of twelve articles providing a comprehensive and very informative summary of contemporary work on lexical blending It combines theoretically informed descriptions of a variety of languages and a number of contributions with a theoretically original focus It is the first book of its kind on the subject and because of its cross disciplinary nature it is of high relevance not only to word formation scholars and students but also to a wide readership within the linguistics community

Analogy and Contrast in Language Karolina Krawczak, Barbara Lewandowska-Tomaszczyk, Marcin Grygiel, 2022-10-15 Within cognitive and functional approaches to language structure and grammaticality analogy and contrast represent two fundamental human cognitive capacities which up to now have mostly been examined separately This volume seeks to bridge that gap and in doing so it brings together cutting edge theoretical and empirical research in the field The chapters in this book examine analogy and contrast across a variety of languages English Finnish Hungarian Polish Russian for different language phenomena constructions lexical semantics morphology sentence structure text organization and with the use of various methods corpus linguistics discourse analysis experimental methods qualitative analysis quantitative analysis This state of the art research presented in the book should be of interest to specialists within Cognitive Linguistics corpus linguistics construction grammar discourse analysis translation studies metaphor research and cross cultural research

Blending, from English to Arabic Ekhlal Ali Mohsin, 2021-07-05 This book examines the interesting linguistic phenomenon of blending where new words are formed to enrich the lexicon of a language Blending in English has been thoroughly investigated to the extent that researchers and scholars refer to the results of these investigations when discussing this phenomenon in their respective languages This book builds on existing studies by investigating blending in Arabic and adopts a linguistic systematic and quantitative approach to discussing and analysing this process It presents practical findings and prepares the road for further investigation in this field

Crossing Languages to Play with Words Sebastian Knospe, Alexander Onysko, Maik Goth, 2016-09-26 Wordplay involving several linguistic codes is an important modality of ludic language This volume offers a multidisciplinary approach to the topic discussing examples from different epochs genres and communicative situations The contributions illustrate the multi dimensionality linguistic make up and the special interactive potential of wordplay across linguistic and cultural boundaries including the challenging practice of translation

Expanding the Lexicon Sabine Arndt-Lappe, Angelika Braun, Claudine Moulin, Esme Winter-Froemel, 2018-01-22 The creation of new lexical units and patterns has been studied in different research frameworks focusing on either system internal or system external aspects from which no comprehensive view has emerged The volume aims to fill this gap by studying dynamic processes in the lexicon understood in a wide sense as not being necessarily limited to the word level by bringing together approaches directed to morphological productivity as well as approaches analyzing

general types of lexical innovation and the role of discourse related factors The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers motivations for innovating Moreover the diffusion and conventionalization of innovations will be addressed In this way the volume contributes to understanding the complex interplay of structural cognitive and functional factors in the lexicon as a highly dynamic domain **Compounding in**

Modern Greek Angela Ralli,2012-10-29 One of the core challenges in linguistics is elucidating compounds their formation as well as the reasons their structure varies between languages This book on Modern Greek rises to the challenge with a meticulous treatment of its diverse intricate compounds a study as grounded in theory as it is rich in data Enhancing our knowledge of compounding and word formation in general its exceptional scope is a worthy model for linguists particularly morphologists and offers insights for students of syntax phonology dialectology and typology among others The author examines first tier themes such as the order and relations of constituents headedness exocentricity and theta role saturation She shows how Modern Greek compounding relates to derivation and inflection and charts the boundaries between compounds and phrases Exploring dialectically variant compounds and identifying historical changes the analysis extends to similarly formed compounds in wholly unrelated languages *Journal of Linguistics* ,2013 **Languages for Special**
