Design Tools For Evidence Based Healthcare Design:

Design Tools for Evidence-Based Healthcare Design Michael Phiri, 2014-12-05 The growing movement towards evidence based healthcare design has largely emphasised a change of culture and attitudes It has advocated for new ways of working but until now it has not focused on equipping healthcare clients and their designers with the practical means to exploit the potential benefits from evidence based architectural design Development of indicators and tools that aid designers and users of the built environments in thinking about quality enhances the design process to achieve better outcomes Importantly design tools can support managers and designers through end user involvement and an increased understanding of what patients and staff expect from their healthcare facilities They can facilitate the creation of patient centred environments which improve user satisfaction Design Tools for Evidence Based Healthcare Design Discusses the tools that are being used to achieve design quality and excellence within the context of NHS procurement systems such as PFI Procure21 and others Collates information that increases our understanding of these tools in order to be able to make the best use of them Clarifies where during the various stages of a building's life from inception design construction occupation and re use these tools should be used in order to derive the benefits possible from evidence based design Provides in one place an authoritative reference publication that will act as a memory a user guide and manual for these design tools Illustrated with case studies from throughout the UK and written by a well known expert in the field this book will provide essential reading for anyone involved in healthcare design

Evidence-Based Healthcare Design Rosalyn Cama, 2009-03-09 If designed properly a healthcare interior environment can foster healing efficient task performance and productivity effective actions and safe behavior Written by an expert practitioner Rosalyn Cama FASID this is the key book for interior designers and architects to learn the methodology for evidence based design for healthcare facilities Endorsed by the American Society of Interior Designers the guide clearly presents a four step methodology that will achieve the desired outcome and showcases the best examples of evidence based healthcare interiors With worksheets that guide you through such practical tasks as completing an internal analysis of a client's facility and collecting data this book will inspire a transformation in healthcare design practice

Sustainability and Evidence-Based Design in the Healthcare Estate Michael Phiri, Bing Chen, 2013-11-18 This work aims to deepen our understanding of the role played by technical guidelines and tools for the design construction and operation of healthcare facilities ultimately establishing the impact of the physical environment on staff and patient outcomes Using case studies largely drawn from the UK Europe China and Australasia design approaches such as sustainability e.g targets for energy efficiency carbon neutrality reduction of waste evidence based design EBD and Post Project Evaluation PPE are examined in order to identify policies mechanisms and strategies that can promote an integrated learning environment that in turn supports innovation in healthcare

Planning and Designing Healthcare Facilities Vijai Kumar Singh, Paul Lillrank, 2017-10-30 The planning and design of healthcare facilities has evolved over the previous decades

from function follows design to design follows function Facilities stressed the functions of healthcare providers but patient experience was not fully considered The design process has now crucially evolved and currently the impression a hospital conveys to its patients and community is the primary concern The facilities must be welcoming comfortable and exude a commitment to patient well being Rapid changes and burgeoning technologies are now major considerations in facility design Without flexibility hospitals face quicker obsolescence if designs are not forward thinking Planning and Designing Healthcare Facilities A Lean Innovative and Evidence Based Approach explores recent developments in hospital design Medical facilities have been adapted to the requirements of clinical functions Recently the needs of patients and clinical pathways have been recognized With the patient at the center of the process the flow of tasks becomes the guiding principle as hospital design must employ evidence based thinking and process management methods such as Lean become central The authors explain new concepts to reduce healthcare delivery cost but keep quality the primary consideration Concepts such as sustainability i e Green Hospitals and the use of new tools and technologies such as information and communication technology ICT Lean and evidence based planning and innovations are fully explained *Birth Environments, Spaces and Architecture* Sarah Joyce, 2025-11-24 Bringing a design perspective to the birth environment this fascinating book collects and critically examines the knowledge we have It exposes the social political and historical thinking that influences the way birth spaces have been designed and looks at how they can be designed in future The book starts by examining changing historical attitudes to childbirth and uses maternity and architectural policy and practice to develop this story It explores both the idea of fitting childbirth into the machine and the resistance to this along with the emergence of the idea of the birth environment From there it describes the best evidence we have on how the design of spaces impact on childbirth experiences and outcomes Drawing on an international selection of case studies the book gives the reader insights into regional differences in birth culture and environments across the globe and offers the opportunity to imagine birth environments of the future based on the most up to date evidence from medicine midwifery anthropology design and architecture Including practical recommendations as well as big picture thinking this book is written for all those with an interest in creating the best possible environments for childbirth as part of supporting a healthy start to a child's life It is especially relevant for midwives and other maternity care practitioners and administrators *The Age-friendly Lens* Christie M. Gardiner, Eileen O'Brien Webb, 2022-08-05 This book engages with the concept of age friendly environments adopting multi perspectivity to demonstrate how age friendly environments can contribute to shifting how we think feel and act toward issues of age and ageing and operate as a vehicle to improve understandings of ageism Drawing from traditionally distinct fields the text demonstrates theoretical and applied dimensions of the age friendly global agenda with several chapters discussing topics that have to date been underrepresented in age friendly scholarship including education health and justice systems The case studies encourage critical engagement with the issue of ageism in age friendly scholarship It presents a clear understanding

of the inequalities challenges and opportunities of ageing and of the ways international regional national and sub national commitments in health development and human rights and are further impacted by ageing through designing implementing monitoring and evaluating policies and programmes The essays utilise a critical and interdisciplinary dialogue to enhance discussion of the age friendly environment agenda through the inclusion of age friendly perspectives in addition to its processes and destinations in an ageing society The book serves as a catalyst to stimulate research policy and public interest in the physical social and regulatory environments in which we age and the consequent impact upon health and well being It will be of interest to professors graduate students and undergraduate students in policy sociology health planning and gerontology It is also recommended reading for policy makers politicians think tanks and lobbyists who are concerned with age all age inclusiveness

Light in Engineering, Architecture and the Environment Konrad Domke, C. A. Brebbia, 2011 The Wessex Institute of Technology has for years been convening conferences on sustainable architecture and planning design in nature heritage architecture and environmental health With the growing importance of lighting in the creation of better healthier environments the enhancement of heritage architecture and the recovery of urban areas as well as new developments in more sustainable lighting it became clear that a conference focusing on lighting issues would be useful This book contains the papers to be presented at the first International Conference on Lighting in Engineering Architecture and the Environment discussing the latest developments in a variety of topics related to light and illumination from its engineering aspects to its use in art and architecture and the effect of light on living systems and human health Ranging from discussions of technical issues regarding equipment design and light measurement to human perception of light and the effect of light on human health the book will be of interest to architectures planners environmental health experts and stage designers in academia industry and government as well as colleagues discussing the latest developments in a variety of topics related to light and illumination from its engineering aspects to its use in art and architecture and the effect of light on living systems and human health
