Critical Theory Since Plato:

Critical Theory Since Plato Hazard Adams, 1971 CRITICAL THEORY SINCE PLATO is a chronologically arranged anthology that presents a broad survey of the history and development of literary criticism and theory in Western culture. Written by two well known scholars in the field of literary study this well respected text puts an emphasis on the individual contributors to the development of literary criticism from Plato and Aristotle to the present. **Critical Theory Since Plato, Pp. 1041-1048** H. Adams, Critical Theory Since Plato Hazard Adams, 1992 This outstanding anthology traces major critical statements from classic theorists like Plato to the contemporary. This standard historical textbook in the field focuses on important individual thinkers and not particular schools of thought or isms. Current selections bring the anthology into contemporary times and show students how critical theory has evolved and progressed over time. **Murray Krieger and Contemporary Critical Theory** Bruce Henricksen, 1986-05-19 Why do smokers claim that the first cigarette of the day is the best? What is the biological basis behind some heavy drinkers' belief that the hair of the dog method alleviates the effects of a hangover? Why does marijuana seem to affect one's problem solving capacity? *Intoxicating Minds* is in the author's words a grand excavation of drug myth. Neither extolling nor condemning drug use it is a story of scientific and artistic achievement, war and greed, empires and religions and lessons for the future. Ciaran Regan looks at each class of drugs describing the historical evolution of their use, explaining how they work within the brain's neurophysiology and outlining the basic pharmacology of those substances. From a consideration of the effect of stimulants such as caffeine and nicotine and the reasons and consequences of their sudden popularity in the seventeenth century the book moves to a discussion of more modern stimulants such as cocaine and ecstasy. In addition Regan explains how we process memory, the nature of thought disorders and therapies for treating depression and schizophrenia. Regan then considers psychedelic drugs and their perceived mystical properties and traces the history of placebos to ancient civilizations. Finally *Intoxicating Minds* considers the physical consequences of our co-evolution with drugs, how they have altered our very being and offers a glimpse of the brave new world of drug therapies. **Close Reading** Frank Lentricchia, Andrew DuBois, 2003 A reader intended for courses presenting the continuity of close reading from New Criticism through poststructuralism. **Machado de Assis and Narrative Theory** Earl E. Fitz, 2019-06-05 This book makes the argument that Machado de Assis hailed as one of Latin American literature's greatest writers was also a major theoretician of the modern novel form. Steeped in the works of Western literature and an imaginative reader of French Symbolist poetry Machado creates between 1880 and 1908 a new narrative one that will presage the groundbreaking theories of Swiss linguist Ferdinand de Saussure by showing how even the language of narrative cannot escape being elusive and ambiguous in terms of meaning. It is from this discovery about the nature of language as a self-referential semiotic system that Machado crafts his new narrative. Long celebrated in Brazil as a dazzlingly original writer Machado has struggled to gain respect and attention outside the Luso-Brazilian ken. He is the

epitome of the outsider or marginal the iconoclastic and wildly innovative genius who hails from a culture rarely studied in the Western literary hierarchy and so consigned to the status of eccentric Had the Brazilian master written not in Portuguese but English French or German he would today be regarded as one of the true exemplars of the modern novel in expression as well as in theory Published by Bucknell University Press Distributed worldwide by Rutgers University Press *Taming the Chaos* Emerson R. Marks, 1998 Alone among artists poets are at once blessed and burdened by the inherent semantic component and the tarnishing social employment of their linguistic medium In an effort to define the mysterious and attractive power of poetic discourse Emerson Marks undertakes a comparison of successive attempts to explain the phenomenon TAMING THE CHAOS is an ambitious study of poetic language **The Ends of Theory** Jerry Herron, 1996 Featuring diverse disciplines and including creative as well as critical work *The Ends of Theory* both exemplifies the impact of critical theory and questions its future The sixteen essays in this anthology reflect on the nature and purpose of theoretical work in the humanities and succeed in bridging critical and creative production Contributors include Arthur Danto Paul A Bov Bob Perelman and Steve McCaffery Key Terms in Literary Theory Mary Klages, 2012-03-29 Students of literature film and cultural studies need to understand key theoretical terms and concepts but often find it hard to get to grips with exactly what they mean This book provides precise definitions of terms and concepts in literary theory along with explanations of the major movements and figures in literary and cultural theory and an extensive bibliography It is designed for the student who needs to know what a particular term means how it is used and where it comes from and enables them to apply the terms and concepts to their own investigations The three part structure provides clear definitions of key terms and ideas introductions to major figures including biographical and historical overviews and an annotated guide to important works This invaluable resource provides readers with an easily accessible and comprehensive reference guide to literary and cultural theory

Resistance to Science in Contemporary American Poetry Bryan Walpert, 2011-09-26 This book examines types of resistance in contemporary poetry to the authority of scientific knowledge tracing the source of these resistances to both their literary precedents and the scientific zeitgeists that helped to produce them Walpert argues that contemporary poetry offers a palimpsest of resistance using as case studies the poets Alison Hawthorne Deming Pattiann Rogers Albert Goldbarth and Joan Retallack to trace the recapitulation of romantic arguments inherited from Keats Shelly and Coleridge which in turn were produced in part in response to Newtonian physics modernist arguments inherited from Eliot and Pound arguments influenced in part by relativity and quantum theory and postmodernist arguments arguments informed by post structuralist theory e g Barthes Derrida Foucault with affinities to arguments for the limitations of science in the philosophy sociology and rhetoric of science Some of these poems reveal the discursive ideologies of scientific language reveal in other words the performativity of scientific language In doing so these poems themselves can also be read as performative acts and therefore as forms of intervention rather than representation Reading Retallack alongside science studies scholar Karen Barad the

book concludes by proposing that viewing knowledge as a form of intervention rather than representation offers a bridge between contemporary poetry and science
