Designing and Conducting Health Surveys Lu Ann Aday, Llewellyn J. Cornelius, 2011-01-20. *Designing and Conducting Health Surveys* is written for students, teachers, researchers, and anyone who conducts health surveys. This third edition of the standard reference in the field draws heavily on the most recent methodological research on survey design and the rich storehouse of insights and implications provided by cognitive research on question and questionnaire design in particular. This important resource presents a total survey error framework that is a useful compass for charting the dangerous waters between systematic and random errors that inevitably accompany the survey design enterprise. In addition, three new studies based on national, international, and state and local surveys—the UNICEF Multiple Indicator Cluster Surveys, California Health Interview Survey, and National Dental Malpractice Survey—are detailed that illustrate the range of design alternatives available at each stage of developing a survey and provide a sound basis for choosing among them.

Designing and Conducting Health Surveys Lu Ann Aday, 1989. L'auteur décrit des stratégies pratiques pour planifier et gérer les phases d'une enquête sur la santé. Et cela en incluant les variables méthodologiques attribuées à la collecte de données, la création du questionnaire, et la description des résultats.
