Heritage Tourism and Cities in China Honggang Xu, Trevor Sofield, 2019-07-09 China has surged into the 21st century as one of the most rapidly modernizing countries in the world Its burgeoning cities reflect this extraordinary growth with a dazzling array of new architectural forms and designs In its transformation the 5000 year old heritage of its built civilization embedded in its villages towns and cities has often been replaced The Chinese Government aware of the value of this heritage has in recent years taken concrete steps to conserve and preserve not just national icons such as the Forbidden Palace in Beijing the Great Wall of China and the Grey Goose Pagoda in Xian but also the more general historic fabric of its urban development over the centuries The challenges are great particularly as population growth and rural urban drift have combined to place enormous pressure on city resources The chapters in this book explore these challenges as well as analysing other institutional cultural social and economic issues related to urban heritage conservation and utilization with a focus on the role of tourism in reinforcing conservation values by finding new uses for old buildings and districts This book covers new areas of heritage tourism research in Chinese cities The chapters were originally published in a special issue of the Journal of Heritage Tourism **Clearinghouse Review** ,2007 **Second Founding** David Quigley, 2004 Publisher Description **Official Gazette of the United States Patent and Trademark Office** ,2005-07-12 **Bradshaw's Railway Manual, Shareholders' Guide, and Official Directory for ...** ,1894 **The Oxford Handbook of Classical Chinese Literature** Wiebke Denecke, Wai-Yee Li, Xiaofei Tian, 2017-03-21 This volume introduces readers to classical Chinese literature from its beginnings ca 10th century BCE to the tenth century CE It asks basic questions such as How did reading and writing practices change over these two millennia How did concepts of literature evolve What were the factors that shaped literary production and textual transmission How do traditional bibliographic categories modern conceptions of genre and literary theories shape our understanding of classical Chinese literature What are the recurrent and evolving concerns of writings within the period under purview What are the dimensions of human experience they address Why is classical Chinese literature important for our understanding of pre modern East Asia How does the transmission of this literature in Japan Korea and Vietnam define cultural boundaries And what in turn can we learn from the Chinese style literatures of Japan Korea and Vietnam about Chinese literature In addressing these questions the Oxford Handbook of Classical Chinese Literature departs from standard literary histories and sourcebooks It does not simply categorize literary works according to periods authors or texts Its goal is to offer a new conceptual framework for thinking about classical Chinese literature by defining a four part structure The first section discusses the basics of literacy and includes topics such as writing systems manuscript culture education and loss and preservation in textual transmission It is followed by a second section devoted to conceptions of genre textual organization and literary signification throughout Chinese history A third section surveys literary tropes and themes The final section takes us beyond China to the surrounding cultures that adopted

Chinese culture and produced Chinese style writing adapted to their own historical circumstances The volume is sustained by a dual foci the recuperation of historical perspectives for the period it surveys and the attempt to draw connections between past and present demonstrating how the viewpoints and information in this volume yield insights into modern China and east Asia Henning's Scholarly Works on Chinese Combative Traditions Stanley Henning, 2018-03-09 What we think are Asian martial arts is usually derived by Hollywood images fanciful novels and a superficial idea of what role combatives played in the long histories of Far Eastern countries There are only a few people in the world who can truly be called scholars in this field A leading figure in the USA for the study of Chinese martial traditions is Stanley Henning This special anthology is a collection of Henning's superb articles that were previously published in the Journal of Asian Martial Arts including one he co wrote with Marnix Wells a leading British scholar on Chinese martial traditions Henning has little patience for those who miss the original essence of practical martial arts and who fell under the enticement of flowery boxing True combative arts are not play although they influenced other practices In the fifteen chapters included here you ll find a strong historic base for what the martial arts meant in old China and how they changed over the centuries In order to understand martial arts as they were evolving over dynastic periods it is necessary to look at the political and social settings technology and even geography and linguistics When it comes to research Henning presents clear facts and accurate conclusions At the same time he wisely states what is open to debate and requires further research Why is the chapter on Korean martial arts included in this anthology Because the Chinese had tremendous influence on their neighbors including Japan and Korea Thanks to a few scholars like Henning and Wells we are getting a clearer picture of just how much Chinese martial arts have influenced the fighting arts in other countries Leading scholars are having an impact on how Asian martial traditions are perceived understood and practiced Henning introduces the new wave of Chinese scholars who have presented their findings in various articles and books opening new vistas for all interested in this growing field of study at least for those who ready Chinese Fortunately Henning's work is in English This anthology is not an easy read for those unfamiliar with Chinese history the various dynasties the terminology and variety of martial systems However it will no doubt benefit the serious scholar of Chinese martial arts and hopefully others will likewise benefit by patiently reading each chapter to broaden their understanding of the rich martial culture of China **Parliamentary Representation in Central Asia** Esther

Somfalvy, 2020-06-09 This book explores the nature of parliamentary representation within the autocratic regimes of Kazakhstan and Kyrgyzstan It argues that although many parliaments are elected under flawed or non competitive elections autocratic governments are nevertheless aware of the need to appear representative and accessible to the demands of citizens and that even limited parliaments manage to represent their voters sometimes in ways not intended by the regime The book examines how elites structure manage and organize representation how they foster the desired kind of representation and how they limit the ways in which parliaments fulfil their representative functions The book concludes that

Kazakhstan is a more hegemonic form of autocracy and the Kyrgyz Republic a more competitive form and that the degree to which parliaments fulfil their representational functions and how much room for manoeuvre individual MPs have depends largely on how much parties control candidate selection and the daily schedule and administrative resources of parliaments
