Capitalism And Religion The Price Of Piety:

Capitalism and Religion Philip Goodchild, 2002 Do religions justify and cause violence or are they more appropriately seen as forces for peace and tolerance Featuring contributions from international experts in the field this book explores the debate that has emerged in the context of secular modernity about whether religion is a primary cause of social division conflict and war or whether this is simply a distortion of the true significance of religion and that if properly followed it promotes peace harmony goodwill and social cohesion Focusing on how this debate is played out in the South Asian con

The Future of Continental Philosophy of Religion Clayton Crockett, B. Keith Putt, Jeffrey W. Robbins, 2014-06-26 What is the future of Continental philosophy of religion These forward looking essays address the new thinkers and movements that have gained prominence since the generation of Derrida Deleuze Foucault and Levinas and how they will reshape Continental philosophy of religion in the years to come They look at the ways concepts such as liberation sovereignty and post colonialism have engaged this new generation with political theology and the new pathways of thought that have opened in the wake of speculative realism and recent findings in neuroscience and evolutionary psychology Readers will discover new directions in this challenging and important area of philosophical inquiry

Politics of Divination Joshua Ramey, 2016-09-26 Since the 2008 financial crisis the neoliberal ideas that arguably caused the damage have been triumphant in presenting themselves as the only possible solution for it How can we account for the persistence of neoliberal hegemony in spite of its obviously disastrous effects upon labor capital ecology and society The argument pursued in this book is that part of the persistence of neoliberalism has to do with the archaic and obscure political theology upon which of much of its discourse trades This is a political theology of chance that both underwrites and obscures sacrificial devotion to market outcomes Joshua Ramey structures this political theology around hidden homologies between modern markets as non rational randomizing meta information processors and archaic divination tools which are used in public acts of tradition bound attempts to interpret the deliverances of chance Ramey argues that only by recognizing the persistently sacred character of chance within putatively secularized discourses of risk and randomness can the investments of neoliberal power be exposed at their sacred source and an alternative political theology be constructed

Divine Currency Devin Singh, 2018-04-10 This book shows how early economic ideas structured Christian thought and society giving crucial insight into why money holds such power in the West Examining the religious and theological sources of money's power it shows how early Christian thinkers borrowed ancient notions of money and economic exchange from the Roman Empire as a basis for their new theological arguments Monetary metaphors and images including the minting of coins and debt slavery provided frameworks for theologians to explain what happens in salvation God became an economic administrator for instance and Christ functioned as a currency to purchase humanity's freedom Such ideas in turn provided models for pastors and Christian emperors as they oversaw both resources and people which led to new economic conceptions of state

administration of populations and conferred a godly aura on the use of money Divine Currency argues that this longstanding association of money with divine activity has contributed over the centuries to money's ever increasing significance justifying various forms of politics that manage citizens along the way Devin Singh's account sheds unexpected light on why we live in a world where nothing seems immune from the price mechanism *Radical Political Theology* Clayton Crockett, 2011-01-31

In the 1960s the strict opposition between the religious and the secular began to break down blurring the distinction between political philosophy and political theology This collapse contributed to the decline of modern liberalism which supported a neutral value free space for capitalism It also deeply unsettled political religious and philosophical realms forced to confront the conceptual stakes of a return to religion Gamely intervening in a contest that defies simple resolutions Clayton Crockett conceives of the postmodern convergence of the secular and the religious as a basis for emancipatory political thought Engaging themes of sovereignty democracy potentiality law and event from a religious and political point of view Crockett articulates a theological vision that responds to our contemporary world and its theopolitical realities Specifically he claims we should think about God and the state in terms of potentiality rather than sovereign power Deploying new concepts such as Slavoj Žižek's idea of parallax and Catherine Malabou's notion of plasticity his argument engages with debates over the nature and status of religion ideology and messianism Tangling with the work of Derrida Deleuze Spinoza Antonio Negri Giorgio Agamben Alain Badiou John D Caputo and Catherine Keller Crockett concludes with a reconsideration of democracy as a form of political thought and religious practice underscoring its ties to modern liberal capitalism while also envisioning a more authentic democracy unconstrained by those ties **Credo Credit Crisis** Aidan Tynan, Laurent Milesi, Christopher John Müller, 2017-08-25

Money facilitates the rites and rituals we perform in everyday life More than a mere medium of exchange or a measure of value it is the primary means by which we manifest a faith unique to our secular age But what happens when individual belief credo I believe and the systems into which it is bound credit it believes enter into crisis Where did the sacredness of money come from and does it have a future Why do we talk about debt and repayment in overtly moral terms How should a theological critique of capitalism proceed today With the effects of the 2008 economic crises continuing to be felt across the world this volume brings together some of the most important contemporary voices in philosophy literature theology and critical and cultural theory together in one volume to assert the need to interrogate and broaden the terms of the theological critique of capitalism *Theology of Money* Philip Goodchild, 2007-01-01

Goodchild examines the theory of money in a comparable manner to Adam Smith Karl Marx and Georg Simmel However by contrast to the conclusions of these thinkers he proposes that money is essentially created in excess of reserves making it a simultaneous credit and debt Since money is a debt that must be repaid with interest in the form of money then the creation of money imposes a social demand for an increase in profit and an increase in the creation of money in order to repay debt This vicious circle drives the expansion of the global economy In summary Goodchild argues that money is a promise a

supreme value a transcendent value and an obligation or a law He argues that money has taken the place of God It is the dominant global religion in practice even if no one believes in it in principle **Good News from the Barrio** Harold Joseph Recinos, In a world divided by race ethnicity gender violence and hate Harold Recinos's Good News from the Barrio explores the ways in which the good news of the gospel is at work in Latino barrios He challenges Christians to listen to the gospel in these contexts and offer a prophetic witness to the nation and the church **Intensities** Katharine Sarah Moody, 2016-05-23 Is the affirmation or intensification of life a value in itself Can life itself be thought This book breaks new ground in religious and philosophical thinking on the concept of life It captures a moment in which such thinking is regaining its force and attraction for scholars and the relevance of thought to social cultural political and religious dilemmas about how and why to live Bringing together original contributions by highly distinguished authors in the field of Continental philosophy of religion including John D Caputo Pamela Sue Anderson Philip Goodchild Alison Martin and Don Cupitt this book has a distinctiveness based on its refusal to sit easily within either secular philosophical or theological approaches The concept of life mobilizes a thinking that crosses narrow disciplinary boundaries whilst retaining philosophical rigour Three sections explore the various dimensions of the question of life The Politics of Life Life and the Limits of Thinking and Life and Spirituality This book will be of interest to a broad range of readers in the humanities particularly to philosophers theologians cultural theorists and all those interested in philosophical or theological debates on the concept of life *Interrogating Modernity* Agata Bielik-Robson, Daniel Whistler, 2020-07-17 Interrogating Modernity returns to Hans Blumenberg's epochal The Legitimacy of the Modern Age as a springboard to interrogate questions of modernity secularisation technology and political legitimacy in the fields of political theology history of ideas political theory art theory history of philosophy theology and sociology That is the twelve essays in this volume return to Blumenberg's work to think once more about how and why we should value the modern Written by a group of leading international and interdisciplinary researchers this series of responses to the question of the modern put Blumenberg into dialogue with other twentieth and twenty first century theorists such as Arendt Bloch Derrida Husserl Jonas Latour Voegelin Weber and many more The result is a repositioning of his work at the heart of contemporary attempts to make sense of who we are and how we've got here
