Capitalisms Toxic Assumptions Redefining Next Generation Economics By Eve Poole 2015 03 26:

Capitalism's Toxic Assumptions Eve Poole, 2015-03-12 In Science no one believes the earth is flat any more Economists on the other hand haven't budged from their original worldview Market Capitalism depends on seven big ideas competition the invisible hand utility agency theory pricing shareholder value and limited liability These served the world well in the past but over the years they have become cancerous and are slowly killing the system as a whole Eve Poole argues that if you zoom in on any of these firm foundations they start to blur and wobble Here she offers alternative views for a healthier system And looking at them together it becomes clear why we're so stuck The capitalist system masquerades as a machine programmed by experts with only Economists and Governments qualified to tinker with it But the market is just a mass of messages about supply and demand The rich world shapes the market in its image because it has more votes So if we want to change the way things are we don't need to wait for the experts we can start now In each chapter Poole shows how quiet action by consumers investors employees and employers can make big changes by shifting behaviours and adjusting the way financial votes are cast in the market
