Carbon Meta Nanotubes Synthesis Properties And Applications:

Carbon Meta-Nanotubes Marc Monthieux, 2011-10-27 Meta Nanotubes are a new generation of carbon nanotubes CNTs which result from the chemical transformation of regular CNTs and their subsequent combination with foreign materials atoms molecules chemical groups nanocrystals by various ways such as functionalisation doping filling and substitution These new nanomaterials exhibit enhanced or new properties such as reactivity solubility and magnetism which pristine CNTs do not possess Their many applications include electronic and optoelectronic devices chemical and biosensors solar cells drug delivery and reinforced glasses and ceramics Carbon Meta Nanotubes Synthesis Properties and Applications discusses these third generation carbon nanotubes and the unique characteristics they possess Beginning with a general overview of the subject this book covers the five main categories of meta nanotubes namely Doped Carbon Nanotubes Functionalised Carbon Nanotubes Decorated or Coated Carbon Nanotubes Filled Carbon Nanotubes Heterogeneous Nanotubes Providing unparalleled coverage of these third generation or meta nanotubes and possibilities for future development this book is essential for anyone working on carbon nanotubes *Synthesis and Applications of Nanocarbons* Jean-Charles Arnault, Dominik Eder, 2020-08-28 A crucial overview of the cutting edge in nanocarbon research and applications In *Synthesis and Applications of Nanocarbons* the distinguished authors have set out to discuss fundamental topics synthetic approaches materials challenges and various applications of this rapidly developing technology Nanocarbons have recently emerged as a promising material for chemical energy environmental and medical applications because of their unique chemical properties and their rich surface chemistries This book is the latest entry in the Wiley book series Nanocarbon Chemistry and Interfaces and seeks to comprehensively address many of the newly surfacing areas of controversy and development in the field This book introduces foundational concepts in nanocarbon technology hybrids and applications while also covering the most recent and cutting edge developments in this area of study *Synthesis and Applications of Nanocarbons* addresses new discoveries in the field including Nanodiamonds Onion like carbons Carbon nanotubes Fullerenes Carbon dots Carbon fibers Graphene Aerographite This book provides a transversal view of the various nanocarbon materials and hybrids and helps to share knowledge between the communities of each material and hybrid type

Handbook of Nanomaterials Properties Bharat Bhushan, Dan Luo, Scott R. Schricker, Wolfgang Sigmund, Stefan Zauscher, 2014-03-13 Nanomaterials attract tremendous attention in recent researches Although extensive research has been done in this field it still lacks a comprehensive reference work that presents data on properties of different Nanomaterials This Handbook of Nanomaterials Properties will be the first single reference work that brings together the various properties with wide breadth and scope **Making and Exploiting Fullerenes, Graphene, and Carbon Nanotubes** Massimo Marcaccio, Francesco Paolucci, 2014-08-12 The series Topics in Current Chemistry presents critical reviews of the present and future trends in modern chemical research The scope of coverage is all areas of chemical science including the interfaces

with related disciplines such as biology medicine and materials science The goal of each thematic volume is to give the non specialist reader whether in academia or industry a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed The coverage is not intended to be an exhaustive summary of the field or include large quantities of data but should rather be conceptual concentrating on the methodological thinking that will allow the non specialist reader to understand the information presented Contributions also offer an outlook on potential future developments in the field Review articles for the individual volumes are invited by the volume editors Readership research chemists at universities or in industry graduate students
