Cardiothoracic Surgical Nursing Current Trends In Adult Care:

Cardiothoracic Surgical Nursing Carl Margerson, Jillian Riley, 2008-04-15 Cardiothoracic nursing has undergone great change over the last decade. With the continuing improvement of surgical techniques, pharmacology and pre and post operative care, there have been many new initiatives and innovations in the nature and practice of this specialised sector of nursing. Rehabilitation and patient education are to name but a few of the areas where exciting new challenges and opportunities for cardiothoracic nurses have opened up. This book is a definitive and accessible text for cardiothoracic nurses. Written for nurses from a nursing perspective, it offers practical advice and information on all aspects of cardiothoracic surgical nursing and pays particular attention to the continuing developments cardiothoracic nurses must face. *Nursing the Cardiac Patient* Melanie Humphreys, 2011-08-04 *Nursing the Cardiac Patient* is a practical guide that addresses the management of cardiac patients across the spectrum of health care settings. It assists nurses in developing a complete understanding of the current evidence based practice and principles underlying the care and management of the cardiac patient. It combines theoretical and practical components of cardiac care in an accessible and user friendly format with case studies and practical examples throughout. *Nursing the Surgical Patient* Rosie Pudner, 2010-03-22 The new edition of this highly successful text brings it fully up to date with recent developments in surgical nursing and includes a new chapter on perioperative stress and anxiety. The need for surgical nurses to remain at the cutting edge in relation to their knowledge and skills has never been greater as the demands of higher patient throughput and reduced hospital stays take their toll. *Nursing the Surgical Patient* is written for and by nurses. It adopts a patient centred approach to the care of people requiring a wide variety of surgical procedures. Compiled by experienced practitioners and educators in the field, it covers relevant anatomy and physiology, investigations, brief information on relevant medical conditions leading to surgery, an outline of the surgical procedures and the nursing care the patient will require. The key nursing care issues are described and explored with case studies and care plans to bring theory to life.
