Confronting Inequality Jonathan D. Ostry,Prakash Loungani,Andrew Berg,2019-01-08 Inequality has drastically increased in many countries around the globe over the past three decades The widening gap between the very rich and everyone else is often portrayed as an unexpected outcome or as the tradeoff we must accept to achieve economic growth In this book three International Monetary Fund economists show that this increase in inequality has in fact been a political choice and explain what policies we should choose instead to achieve a more inclusive economy Jonathan D Ostry Prakash Loungani and Andrew Berg demonstrate that the extent of inequality depends on the policies governments choose such as whether to let capital move unhindered across national boundaries how much austerity to impose and how much to deregulate markets While these policies do often confer growth benefits they have also been responsible for much of the increase in inequality The book also shows that inequality leads to weaker economic performance and proposes alternative policies capable of delivering more inclusive growth In addition to improving access to health care and quality education they call for redistribution from the rich to the poor and present evidence showing that redistribution does not hurt growth Accessible to scholars across disciplines as well as to students and policy makers
