Rechtschaffen, RECHTSCHAFFEN ET AL., The American economy looks good This is in the wake of a decade where dramatic failures in individual markets and institutions sparked a global financial crisis resulting in political social and economic unrest In the United States a host of legislative acts completely reshaped the regulatory landscape This book investigates the structure and the workings of financial instruments and the capital markets it considers market evolution after the crisis and the impact of Central Bank policy In doing so it provides the tools to recognize vulnerabilities in capital market trading activities This edition serves to explain the legal and business considerations of capital market participation Regulation and Supervision of the OTC Derivatives Market Ligia Catherine Arias-Barrera, 2018-05-11 The over the counter OTC derivatives market has captured the attention of regulators after the Global Financial Crisis due to the risk it poses to financial stability Under the post crisis regulatory reform the concentration of business and risks among a few major players is changed by the concentration of a large portion of transactions in the new market infrastructures the Central Counterparties CCPs This book for the first time analyses the regulatory response of the United Kingdom and the United States the two largest centres of OTC derivatives transactions and highlights their shortcomings The book uses a normative risk based approach to regulation as a methodological lens to analyse the UK regime of CCPs in the OTC derivatives market It specifically focuses on prudential supervision and conduct of business rules governing OTC derivatives transactions and the move towards enhancing the use of central clearing The resulting analysis from a normative risk based approach

suggests that the UK regime for CCPs does not fulfil what would be expected if a coherent risk based approach was taken Our comments on the Dodd Frank Act highlight that the incoherent adoption of risk based approach to regulation affects the effectiveness of the US regime for CCPs Such a regime does not follow the pace of events of innovation risk in particular the foreseeable changes FinTech will bring to the OTCDM and central clearing services The second inadequacy of the US regime concerns the dual regulatory structure of the CFTC and the SEC and the inadequate adoption of different and not well coordinated regulatory strategies We also analyse the cross border implications of the US regime for non US CCPs that provide clearing services to US market participants Finally we study the negative effects of the absence of a clearly defined resolution regime for CCPs

Regulating EU Capital Markets Union Rüdiger Veil, 2024-03-14 This is the first of a two volume series that examines the current EU capital markets regimes and explores codification as a means for achieving a true single market for capital in Europe

Law and the Political Economy of Hunger Anna Chadwick, 2019-01-31 This book is an inquiry into the role of law in the contemporary political economy of hunger In the work of many international institutions governments and NGOs law is represented as a solution to the persistence of hunger This presentation is evident in the efforts to realize a human right to adequate food as well as in the positioning of law in the form of regulation as a tool to protect society from unruly markets In this monograph Anna Chadwick draws on theoretical work from a range of disciplines to challenge accounts that portray law's role in the context of hunger as exclusively remedial The book takes as its starting point claims that financial traders caused the 2007-8 global food crisis by speculating in financial instruments linked to the prices of staple grains The introduction of new regulations to curb the excesses of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem Chadwick investigates a number of different legal regimes spanning public international law international economic law transnational governance private law and human rights law to gather evidence for a counterclaim law is part of the problem The character of the contemporary global food system a food system that is being progressively financialized owes everything to law If world hunger is to be eradicated Chadwick argues then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry

International Insolvency and Finance Law Daniele D'Alvia, 2022-01-31 Focusing on the Global Financial Crisis 2007-2010 and the new emerging Covid 19 crisis in 2020 this book examines the discourse on risk and uncertainty in the markets through the lens of financial crises Such crises represent a failure of the law to regulate and constitute the basis through which a new theory of legal constants can be introduced in comparative law Crisis impose a dramatic reformulation of the law the Covid 19 confirms this trend and new out of law instances are appearing beyond a paternalistic approach of direct State regulation Restructuring procedures are playing a vital role in businesses survival and new out of law mechanisms such as moratorium agreements and private workouts have become essential to preserve businesses It is clear that the role of the law has completely changed and this

book argues that constants outside of the law are new ways to promote an uncoded codification of the law The case for uncoded uncertainty in the Covid 19 crisis is a primary example of how no codification process can ignore the importance of out of law instances in the act of making law This book explores how this approach influences the harmonisation process of international economic law between national insolvency regimes and international agreed frameworks demonstrating the role of comparative law in formulating legal constants using Covid 19 and the complexity of modern financial markets as the criterion to introduce the reader to this new theory which claims a new role for comparative law in policy making processes within the framework of international economic law Mergers, Acquisitions and International Financial Regulation Daniele

D'Alvia,2021-11-29 This is a much needed work in the financial literature and it is the first book ever to analyse the use of Special Purpose Acquisition Companies SPACs from a theoretical and practical perspective By the end of 2020 more than 240 SPACs were listed in the US on NASDAQ or the NYSE raising a record 83 billion The SPAC craze has been shaking the US for months mainly because of its simplicity a bunch of investors decides to buy shares at a fixed price in a company that initially has no assets In this way a SPAC also known as a blank check company is created as an empty shell with lots of money to spend on a corporate shopping spree Could the trend be here to stay Are SPACs the new legitimate path to traditional IPO This book tackles those questions and more The author provides a thorough analysis of SPACs including their legal framework and how they are used as a risk mitigation tool to structure transactions The main objectives of the book are focused on finding a working definition for SPACs and theorising on their origins definition and evolution identifying the objectives of financial regulation within the context of the recent financial crisis 2007 2010 and the one that is currently unfolding Covid 19 and also describing practical examples of SPACs through a comparative study that for the first time outlines every major capital market on which SPACs are listed in order to identify a possible international standard of regulation The book is relevant to academics as well as policymakers international financial regulators corporate finance lawyers as well as to the financial industry tout court **Transnational Food Security** Emily Webster,Ankita Gupta,Ruth

Ambros,2020-06-09 Transnational Food Security addresses food security from an international relations political economy and legal perspective analysing the relationship between food security and the environment and climate change trade finance and contracts and the intersection between food and human rights The topic of food concerns one of the most basic and profound aspects of human survival Universal and equal access to food is at the same time ridden with problems of power inequality distribution and implicated in old and new geopolitical conflicts As such food and food security are central to conditions of poverty and hunger development and modernisation transitional justice and rule of law reform around the world As a problem of critique and scholarly inquiry food prompts an inter disciplinary assessment of the nature of food security in the modern world The contributors to this book take us deep into the complexity of food and illustrate the challenges of adequately understanding and approaching questions of food security and food sovereignty in a globally interconnected
