Luigi Zingales

Capitalism For The People By Zingalesluigi 2012 Hardcover:

A Capitalism for the People Luigi Zingales, 2014-02-11 Born in Italy University of Chicago economist Luigi Zingales witnessed firsthand the consequences of high inflation and unemployment paired with rampant nepotism and cronyism on a country's economy. This experience profoundly shaped his professional interests and in 1988 he arrived in the United States armed with a political passion and the belief that economists should not merely interpret the world but should change it for the better. In *A Capitalism for the People* Zingales makes a forceful philosophical and at times personal argument that the roots of American capitalism are dying and that the result is a drift toward the more corrupt systems found throughout Europe and much of the rest of the world. American capitalism, according to Zingales, grew in a unique incubator that provided it with a distinct flavor of competitiveness, a meritocratic nature that fostered trust in markets and a faith in mobility. Lately, however, that trust has been eroded by a betrayal of our pro-business elites whose lobbying has come to dictate the market rather than be subject to it, and this betrayal has taken place with the complicity of our intellectual class. Because of this trend, much of the country is questioning, often with great anger, whether the system that has for so long buoyed their hopes has now betrayed them once and for all. What we are left with is either anti-market pitchfork populism or pro-business technocratic insularity. Neither of these options presents a way to preserve what the author calls the lighthouse of American capitalism. Zingales argues that the way forward is pro-market populism, a fostering of truly free and open competition for the good of the people, not for the good of big business. Drawing on the historical record of American populism at the turn of the twentieth century, Zingales illustrates how our current circumstances aren't all that different. People in the middle and at the bottom are getting squeezed while people at the top are only growing richer. The solutions now as then are reforms to economic policy that level the playing field. Reforms that may be anti-business, specifically anti-big business, but are squarely pro-market. The question is whether we can once again muster the courage to confront the powers that be.

Separation of Powers and Antitrust Vincent Martenet, 2023-10-12 Separation of powers and antitrust deal with power and occupy centre stage in our challenging digital times but their interactions have not yet been analysed. This timely and ground-breaking book provides an innovative cross-disciplinary analysis of the potential convergence of these two fields. Notably, Vincent Martenet examines the concentration of politico-economic power in the hands of a few digital firms which have adopted private regulation impacting an entire industry and society at large. He combines doctrinal method with historical developments, case studies, assessment of legislative proposals and observations on the functioning of digital markets and democracy in the digital era. The book sketches important new axes of the separation of powers and suggests that antitrust may contribute, albeit in a limited way, to greater trust in both society and democracy. Antitrust for trust: the ultimate apparent antitrust paradox.
