Beyond the City Felipe Correa, 2016-06-07 During the last decade the South American continent has seen a strong push for transnational integration initiated by the former Brazilian president Fernando Henrique Cardoso who with the endorsement of eleven other nations spearheaded the Initiative for the Integration of Regional Infrastructure in South America IIRSA a comprehensive energy transport and communications network The most aggressive transcontinental

integration project ever planned for South America the initiative systematically deploys ten east west infrastructural corridors enhancing economic development but raising important questions about the polarizing effect of pitting regional needs against the colossal processes of resource extraction Providing much needed historical contextualization to IIRSA s agenda Beyond the City ties together a series of spatial models and offers a survey of regional strategies in five case studies of often overlooked sites built outside the traditional South American urban constructs Implementing the term resource extraction urbanism the architect and urbanist Felipe Correa takes us from Brazil s nineteenth century regional capital city of Belo Horizonte to the experimental circular temporary city of Vila Piloto in Tr s Lagoas In Chile he surveys the mining town of Mar a Elena In Venezuela he explores petrochemical encampments at Judibana and El Tablazo as well as new industrial frontiers at Ciudad Guayana The result is both a cautionary tale bringing to light a history of societies that were inscribed and administered and a perceptive examination of the agency of architecture and urban planning in shaping South American lives **Catalog** University of Texas.
