Carbon And Nitrogen In The Terrestrial Environment:

Carbon and Nitrogen in the Terrestrial Environment R. Nieder, D.K. Benbi, 2008-05-30 Carbon and Nitrogen in the Terrestrial Environment is a comprehensive interdisciplinary description of C and N fluxes between the atmosphere and the terrestrial biosphere issues related to C and N management in different ecosystems and their implications for the environment and global climate change and the approaches to mitigate emission of greenhouse gases Drawing upon the most up to date books journals bulletins reports symposia proceedings and internet sources documenting interrelationships between different aspects of C and N cycling in the terrestrial environment Carbon and Nitrogen in the Terrestrial Environment fills the gap left by most of the currently available books on C and N cycling They either deal with a single element of an ecosystem or are related to one or a few selected aspects like soil organic matter SOM and agricultural or forest management emission of greenhouse gases global climate change or modeling of SOM dynamics A The Terrestrial Environment P. Fritz, 2016-07-29 Handbook of Environmental Isotope Geochemistry Volume 1 The Terrestrial Environment A focuses on isotope hydrology and aqueous geochemistry as well as an overview of carbon sulfur and nitrogen isotopes in terrestrial systems The selection first elaborates on the isotopes of hydrogen and oxygen in precipitation carbon 14 in hydrogeological studies and environmental isotopes in groundwater hydrology Concerns cover groundwater dating mechanism of salinization groundwater recharge models of the isotope fractionation during evaporation and condensation of water in the atmosphere and stable isotope distribution in atmospheric waters The book then examines environmental isotopes in ice and snow isotopic evidence on environments of geothermal systems and sulfur and oxygen isotopes in aqueous sulfur compounds Discussions focus on geochemistry and isotope distribution of aqueous sulfur compounds isotopic dating of geothermal waters origin of chemical constituents geothermometry isotope distribution during the reduction of a temperate snow cover and snow and ice isotope hydrology The manuscript explores environmental isotopes as environmental and climatological indicators sulfur isotopes in the environment nitrogen 15 in the natural environment and the isotopic composition of reduced organic carbon The selection is a valuable reference for researchers interested in isotope geochemistry Carbon Management in Tropical and Sub-Tropical Terrestrial Systems Probir K. Ghosh, Sanat Kumar Mahanta, Debashis Mandal, Biswapati Mandal, Srinivasan Ramakrishnan, 2019-11-23 Soil organic carbon SOC a key component of the global carbon C pool plays an important role in C cycling regulating climate water supplies and biodiversity and therefore in providing the ecosystem services that are essential to human well being Most agricultural soils in temperate regions have now lost as much as 60% of their SOC and as much as 75% in tropical regions due to conversion from natural ecosystems to agricultural uses and mainly due to continuous soil degradation Sequestering C can help to offset C emissions from fossil fuel combustion and other C emitting activities while also enhancing soil quality and long term agronomic productivity However developing effective policies for creating terrestrial C sinks is a serious challenge in tropical and

subtropical soils due to the high average annual temperatures in these regions It can be accomplished by implementing improved land management practices that add substantial amounts of biomass to soil cause minimal soil disturbance conserve soil and water improve soil structure and enhance soil fauna activity Continuous no till crop production is arguably the best example These soils need technically sound and economically feasible strategies to sustainably enhance their SOC pools Hence this book provides comprehensive information on SOC and its management in different land use systems with a focus on preserving soils and their ecosystem services The only book of its kind it offers a valuable asset for students researchers policymakers and other stakeholders involved in the sustainable development and management of natural resources at the global level

Chemical Bioavailability in Terrestrial Environments, 2011-08-31 This book begins with an overview of current thinking on bioavailability its definition cutting edge research in speciation and advancement in tools for assessing chemical bioavailability in the terrestrial environment The second section of the book focuses on the role of chemical speciation in bioavailability Section three addresses bioavailability and ecotoxicity of contaminants and leads into the next section on bioavailability of nutrients and agrichemicals Subsequent sections provide an overview of tools currently being used and new cutting edge techniques to assess contaminant bioavailability The last section of the book builds on previous sections in relating bioavailability to risk assessment and how this could be used for managing risks associated with contaminated land Provides the latest information on developing concepts and definitions of bioavailability Includes a discussion of bioavailability and ecotoxicity of contaminants and bioavailability of nutrients and agrichemicals for applications in agriculture Analyzes tools for assessing bioavailability and the role of bioavailability in risk assessment and remediation

Principles of Terrestrial Ecosystem Ecology Francis Stuart Chapin (III), Pamela A. Matson, Harold A. Mooney, 2002-08-12 Features review questions at the end of each chapter Includes suggestions for recommended reading Provides a glossary of ecological terms Has a wide audience as a textbook for advanced undergraduate students graduate students and as a reference for practicing scientists from a wide array of disciplines

Microplastics in the Terrestrial Environment Surajit Mondal, Papita Das, Arnab Mondal, Poushali Chakraborty, 2024-11-29 This book aims to address details and research gaps in the impacts of microplastics in terrestrial ecosystems It addresses the impact of microplastics on the soil environment and highlights and discusses their transport behavior pollution level and the combined effects of the microplastics with other pollutants on the soil ecology Furthermore it also highlights the effects of UV irradiations and mechanical abrasions from soil fauna and various agricultural practices Features Covers advances in plastic micro nano plastic pollution and possible pathways of pollution Demonstrates the mitigation measures to minimize such pollution loads with a special focus on the application of nanotechnology Explores recycle and value added products from waste plastic Promotes development of alternate clean energy sources Introduces appropriate alternatives and or finding strategies to mitigate the existing microplastic crisis using suitable approaches This book is aimed at researchers and graduate students

in environmental and chemical engineering as well as remediation **Soil Carbon Dynamics** Werner L. Kutsch, Michael Bahn, Andreas Heinemeyer, 2010-01-07 Carbon stored in soils represents the largest terrestrial carbon pool and factors affecting this will be vital in the understanding of future atmospheric CO₂ concentrations This book provides an integrated view on measuring and modeling soil carbon dynamics Based on a broad range of in depth contributions by leading scientists it gives an overview of current research concepts developments and outlooks and introduces cutting edge methodologies ranging from questions of appropriate measurement design to the potential application of stable isotopes and molecular tools It includes a standardised soil CO₂ efflux protocol aimed at data consistency and inter site comparability and thus underpins a regional and global understanding of soil carbon dynamics This book provides an important reference work for students and scientists interested in many aspects of soil ecology and biogeochemical cycles policy makers carbon traders and others concerned with the global carbon cycle **Ecology for the 21st century** Orianna Carter, 2025-07-30 Ecology for the 21st Century is a comprehensive beginner friendly introductory textbook that provides students with an ecological perspective on our changing world Suitable for both non majors and majors level ecology courses this textbook presents clear and wide ranging coverage including many current examples and topics Applying a student centric approach with dynamic examples and case studies the book s ecological principles emerge through topics students care to learn more about The twin evils of atmospheric carbon and ocean acidification are explored through investigations on the health of coral reef ecosystems In addition populations and species dynamics are introduced using classical modeling parameters This textbook drives home the delicate balance of the natural world through regional issues surrounding endangered versus invasive species Themes of resource acquisition adaptation and evolution of species are reinforced throughout encouraging students to envision an ecologically driven world Covers a great breadth of introductory ecology covering topics ranging from climate change to population dynamics and biodiversity loss Functions as core foundational content for both non majors major level ecology courses Features short 10 min interactive videos on topics to reinforce concepts Includes in chapter self assessments with feedback and end of unit study guides Integrates with a current issues discussion forum currently delivered to the online classroom using Packback *Solar System History from Isotopic Signatures of Volatile Elements* R.
