Management covers the core concepts needed to treat the cardiac surgery patient and to the skillset needed to succeed in this field **Artificial Intelligence and Sustainable Computing** Manjaree Pandit,M. K. Gaur,Sandeep Kumar,2024-04-23 This book presents high quality research papers presented at the 5th International Conference on Sustainable and Innovative Solutions for Current Challenges in Engineering and Technology ICSISCET 2023 held at Madhav Institute of Technology Science MITS Gwalior India during October 21 22 2023 The book extensively covers recent research in artificial intelligence AI that knit together nature inspired algorithms evolutionary computing fuzzy systems computational intelligence machine learning deep learning etc which is very useful while dealing with real problems due to their model free structure learning ability and flexible approach These techniques mimic human thinking and decision making abilities to produce systems that are intelligent efficient cost effective and fast The book provides a friendly and informative treatment of the topics which makes this book an ideal reference for both beginners and experienced researchers Management of Cardiac Arrhythmias Gan-Xin Yan,Peter R. Kowey,Charles Antzelevitch,2020-07-27 A significantly expanded third edition this book provides a comprehensive and concise overview of cardiac arrhythmias and their ECG telemetry manifestations including the principles of cardiac electrophysiology current concepts of pharmacology clinical features diagnoses and state of the art treatments Additionally the book emphasizes decision making strategies in approaching each individual patient and the application of technical innovations in specific clinical situations Organized into eight parts beginning chapters introduce the concepts and principles of cardiac electrophysiology unique rhythms and ECG waves signs These chapters are designed to integrate emerging knowledge in basic science and clinical medicine Subsequent chapters focus on the diagnosis of a variety of cardiac arrhythmias using non invasive methodology Throughout the book chapters continue to analyze pharmacological and other approaches to therapy of specific arrhythmias including supraventricular tachycardias atrial fibrillation and flutter ventricular arrhythmias and bradyarrhythmias Finally the book closes with coverage on inherited cardiac arrhythmia syndromes including the long short QT and J wave syndromes catecholaminergic polymorphic ventricular tachycardia and arrhythmogenic right ventricular cardiomyopathy The third edition of Management of Cardiac Arrhythmias is an essential resource for physicians residents fellows and medical students in cardiology cardiac surgery vascular surgery cardiac electrophysiology and cardiac radiology **Fundamental Approaches to the Management of Cardiac Arrhythmias** Ruey J. Sung,M.R. Lauer,2012-12-06 This new edition provides up to date comprehensive coverage of the rapidly evolving field of clinical cardiac electrophysiology It is designed for physicians cardiologists cardiac electrophysiologists and allied professionals practising or learning the speciality of clinical cardiac electrophysiology This textbook written entirely by two practising authorities in the field offers a cohesive and comprehensive summary of the principles and practice of clinical cardiac electrophysiology The authors emphasize the clinical approach to the patient and provide a fundamental yet thorough discussion of the primary therapeutic modalities used today in a state of the art electrophysiology laboratory including the

latest pharmacotherapy options catheter ablation treatment and the newest implantable devices The authors provide the reader with a concise organized discussion of the management of patients with benign to life threatening arrhythmias using the newest concepts equipment and techniques of diagnostic and therapeutic electrophysiology

Neuro-informatics and Neural Modelling F. Moss, S. Gielen, 2001-06-26 How do sensory neurons transmit information about environmental stimuli to the central nervous system How do networks of neurons in the CNS decode that information thus leading to perception and consciousness These questions are among the oldest in neuroscience Quite recently new approaches to exploration of these questions have arisen often from interdisciplinary approaches combining traditional computational neuroscience with dynamical systems theory including nonlinear dynamics and stochastic processes In this volume in two sections a selection of contributions about these topics from a collection of well known authors is presented One section focuses on computational aspects from single neurons to networks with a major emphasis on the latter The second section highlights some insights that have recently developed out of the nonlinear systems approach
