Textbook of Remedial Massage Sandra Grace, Jane Graves, 2019-09-30 Textbook of Remedial Massage 2e is a comprehensive and practical book for students and practitioners of remedial massage. Written by Sandra Grace and Jane Graves, the text provides expert instruction in commonly used and highly valued remedial massage techniques including trigger points, muscle stretching, and myofascial release. Each technique is accompanied by step-by-step illustrations and photographs. Physiological principles, current evidence of efficacy, contraindications, and precautions are detailed. A detailed approach to assessments, including red flags for serious conditions requiring referral, is provided. An evidence-based approach to assessment and treatment is emphasized. Comprehensive coverage of techniques that are included in remedial massage programs is provided. Focus on functional anatomy. Assessment videos of major regions of the body and the integration of treatment techniques that are specific to the target tissue.

The Science of Forensic Entomology David B. Rivers, Gregory A. Dahlem, 2023-11-20 The Science of Forensic Entomology builds a foundation of biological and entomological knowledge that equips the student to be able to understand and resolve questions concerning the presence of specific insects at a crime scene in which the answers require deductive reasoning, seasoned observation, reconstruction, and experimentation. Features required of all disciplines that have hypothesis testing at its core. Each chapter addresses topics that delve into the underlying biological principles and concepts relevant to the insect biology that forms the bases for using insects in matters of legal importance. The book is more than an introduction to forensic entomology as it offers in-depth coverage of non-traditional topics including the biology of maggot masses, temperature tolerances of necrophagous insects, chemical attraction and communication, reproductive strategies of necrophagous flies, archaeoentomology, and use of insects in modern warfare/terrorism. As such, it will enable advanced undergraduate and postgraduate students the opportunity to gain a sound knowledge of the principles, concepts, and methodologies necessary to use insects and other arthropods in a wide range of legal matters.
