The Arts and Youth at Risk Kate Donelan, Angela O'Brien, 2009-05-05 *The Arts and Youth at Risk* Global and Local Challenges is a contribution to the lively international dialogue about creative and arts based interventions for young people categorized as at risk It contains chapters written by internationally recognized researchers and practitioners in arts education youth arts and criminology The instrumental benefit of arts participation for disadvantaged and marginalized young people is an area of increasing interest worldwide This body of research highlights the positive educational and social outcomes of arts programs within and outside the schooling system It also interrogates the ethics of arts interventions in a diverse and socially inequitable global context The book questions the motivations of those working with at risk youth and challenges practitioners to ensure that their work with marginalised communities is efficacious as well as socially and politically responsible Professor Shirley Brice Heath describes this book as philosophically complex and pragmatically provocative She commends the editors and authors for taking the brave stance of interrogating the consequences trajectories and effects of participation in the arts by young people especially those who carry labels such as at risk She calls attention to the critical need as outlined in this volume to consider contextual background as well as an international perspective on children and youth when planning and delivering social and arts based interventions

Zen-Brain Horizons James H. Austin, 2014-08-22 A neurologist and Zen practitioner clarifies the benefits of meditative training drawing on classical Buddhist literature and modern brain research In *Zen Brain Horizons* James Austin draws on

his decades of experience as a neurologist and Zen practitioner to clarify the benefits of meditative training Austin integrates classical Buddhist literature with modern brain research exploring the horizons of a living neural Zen When viewed in the light of today the timeless wisdom of some Zen masters seems almost to have anticipated recent research in the neurosciences The keen attentiveness and awareness that we cultivate during meditative practices becomes the leading edge of our subsequent mental processing Austin explains how our covert involuntary functions can make crucial contributions to the subtle ways we learn intuit and engage in creative activities He demonstrates why living Zen means much more than sitting quietly indoors on a cushion and provides simplified advice that helps guide readers to the most important points

Wonder Vlad P. Glaveanu, 2020-06-25 This book is dedicated to wonder and wondering mundane phenomena that despite their great value for education and other spheres of human experience often go unnoticed both inside and outside the classroom Praised as the origin of philosophy in ancient times the concern for understanding and educating wonder has been present throughout history It is not only the case that this basic psychological process opens our everyday experience to what is possible what lies beyond the here and now but does so with extraordinary consequences Wonder transforms our experience of the world from early childhood onwards It is ever present in children s play and games it offers constant opportunities for learning and it fuels our creativity And yet we know little about this phenomenon its biological psychological social and cultural underpinning and even less about how to foster it and harness its benefits in education This book fills this gap and gives a scientific yet accessible account of wondering It proposes a new way of understanding wonder while at the same time offering practical tools for cultivating wonder within ourselves our interpersonal relations and within educational practice
