

## HOW TO IDENTIFY YOUR CLINTON ENGINE

A very important element in owning a CLINTON engine is the world wide service and repair. A new team of identification has been established as a key for obtaining this service. The basis of this system of identification begins with the Name Plate which was permanently attached to your engine at the factory. The reference for all Service and Repair for your engine will be found on this Name Plate. It is very important that the plate remain with the engine. Should it ever become necessary to remove that part of your engine to verify the Name Plate is attached, make certain to replace the plate and place it on the same part. Following on this page is additional information concerning the Name Plate as a key to service.

### 1 HOW TO FIND MODEL

| SERIAL NO. | MODEL NO. |
|------------|-----------|
| 120852 B   | B-750 A08 |

The Model Number of your engine is found on the Name Plate. In this example the Model Number is 120852 B. Then, by looking in Section II, Division B-750, you will find the abbreviated Basic Parts List. For example, if the Model Number was D-1150, you would turn to Section II, Div. D-1150, etc. In some cases the model will be shown as B-750-A08 or D-750-A08, which would be the B-750-1000 Series or D-750-1000 Series with model variations shown in the last three digits.

### 2 HOW TO DETERMINE MODEL VARIATION

The Model is further identified by the last TWO digits in the model designation number, in this example, 08. In some cases, and in some production runs, additional letters or numbers are placed on the model number. The lettering system has been discontinued. Due to varied endorsement of many series, there may be a large number of models. A complete list of these models, referred to as MODEL VARIATIONS, will be found following each Basic Parts List. Under the name system of assigning model variation numbers, the first variation from the standard engine will begin with "000". A typical model number might be 120852 B for example. The Model Variation List following each Basic Parts List will tell what parts or assemblies are used on each variation. IN ADDITION TO AN INCREASE OF THE STANDARD PARTS LISTED IN THE Basic Parts List. In the case of the name plate shown above, by looking in the Model Variation List following the Basic Parts List for the B-750 series, you find that the B-750-A08 has a special crankshaft, a gear reduction assembly and that the gear reducer is mounted in the 1200 position. If an increase is given in the gear reducer, then you would turn to Section III (Accessories) and look up the part under the appropriate assembly number, in this case 2000.

### 3 HOW TO DETERMINE TYPE

You must also determine the basic TYPE of your engine. The TYPE in a Clinton engine is always shown as a Small LETTER following the Model Number. 120852 B is your example.

There will be a separate Division in Section II for each type change of an engine series or a special feature at the beginning of the Basic Parts List.

There are the (C) basic types of the B-750 Series engine:

1. No Serial Number suffix—referred to as "Type B 000"
2. Serial Number suffix "A"—referred to as "Type A"
3. Serial Number suffix "B"—referred to as "Type B", etc., etc.

There are the Model Types and are covered by the Basic Parts List. Whenever a part or assembly is not used on all Types, it will be noted. If no note appears, this means that the part will be found on ALL TYPES.

### 4 HOW TO ORDER PARTS

SECTION I PRICE LIST contains descriptions of the various engine Series and up to date Kopp's prices will furnish the current prices for replacement engines with or without accessories. Division II of this section is a numbered Parts Price List. ALWAYS CHECK PART NUMBERS WITH THE PRICE LIST to make sure that this part is available on the current PRICE LIST. ALWAYS ORDER BY PART NUMBER.
